2016 – The Architectural Work of Le Corbusier, an Outstanding Contribution to the Modern Movement (Criteria I, ii, iv)

Brief description

Chosen from the work of Le Corbusier, the 17 sites comprising this transnational serial property are spread over seven countries and are a testimonial to the invention of a new architectural language that made a break with the past. They were built over a period of a half-century, in the course of what Le Corbusier described as “patient research”. The Complexe du Capitole in Chandigarh (India), the National Museum of Western Art, Tokyo (Japan), the House of Dr Curutchet in La Plata (Argentina) and the Unité d’habitation in Marseille (France) reflect the solutions that the Modern Movement sought to apply during the 20th century to the challenges of inventing new architectural techniques to respond to the needs of society. These masterpieces of creative genius also attest to the internationalization of architectural practice across the planet.

Justification for Inscription

Criterion (i): The Architectural Work of Le Corbusier represents a masterpiece of human creative genius, providing an outstanding response to certain fundamental architectural and social challenges of the 20th century.

Criterion (ii): The Architectural Work of Le Corbusier exhibits an unprecedented interchange of human values, on a worldwide scale over half a century, in relation to the birth and development of the Modern Movement.

The Architectural Work of Le Corbusier revolutionized architecture by demonstrating, in an exceptional and pioneering manner, the invention of a new architectural language that made a break with the past.

The Architectural Work of Le Corbusier marks the birth of three major trends in modern architecture: Purism, Brutalism and sculptural architecture.

The global influence reached by The Architectural Work of Le Corbusier on four continents is a new phenomenon in the history of architecture and demonstrates its unprecedented impact.

Criterion (vi): The Architectural Work of Le Corbusier is directly and materially associated with ideas of the Modern Movement, of which the theories and works possessed outstanding universal significance in the twentieth century. The series represents a “New Spirit” that reflects a synthesis of architecture, painting and sculpture.

The Architectural Work of Le Corbusier materializes the ideas of Le Corbusier that were powerfully relayed by the International Congress of Modern Architecture (CIAM) from 1928. The Architectural Work of Le Corbusier is an outstanding reflection of the attempts of the Modern Movement to invent a new architectural language, to modernize architectural techniques, and to respond to the social and human needs of modern man.

The contribution made by the Architectural Work of Le Corbusier is not merely the result of an exemplary achievement at a given moment, but the outstanding sum of built and written proposals steadfastly disseminated worldwide through half a century.

Briève description

Le Palais royal des expositions et les jardins Carlton qui l'entourent ont été conçus pour les grandes expositions internationales de 1880 et 1888 à Melbourne. Le bâtiment et le terrain ont été dessinés par Joseph Reed. Le bâtiment, construit en brique, bois, acier et ardoise, amalgame des traits byzantins, romans, lombards et de la Renaissance italienne. Cet ensemble est représentatif du mouvement des expositions internationales. Entre 1851 et 1915, plus de 50 d'entre elles furent organisées dans des villes comme Paris, New York, Vienne, Calcutta, Kingston (Jamaïque) et Santiago du Chili, sur la base d'un principe et d'un objectif commun : dresser un état des lieux du progrès en exposant les réalisations de tous les pays.

Justification d'inscription

Critère (i) : L'œuvre architecturale de Le Corbusier représente une création majeure du génie humain qui apporte une réponse exceptionnelle à certains enjeux fondamentaux de l'architecture et de la société au XXe siècle.

Critère (ii) : L'œuvre architecturale de Le Corbusier témoigne d'un échange d'influences sans précédent, qui s'est étendu à l'échelle de la planète pendant un demi-siècle, en relation avec la naissance et le développement du mouvement moderne.

L'œuvre architecturale de Le Corbusier révolutionna l'architecture, en témoignant de manière exceptionnelle et pionnière de l'invention d'un nouveau langage architectural en rupture avec le passé.

L'œuvre architecturale de Le Corbusier marque la naissance de trois courants majeurs dans l'architecture moderne : le purisme, le brutalisme et l'architecture-sculpture.

La dimension planétaire qu'atteint l'œuvre architecturale de Le Corbusier sur quatre continents est un phénomène nouveau dans l'histoire de l'architecture et témoigne de son impact sans précédent.

Critère (vi) : L'œuvre architecturale de Le Corbusier est directement et matériellement associée aux idées du mouvement moderne, dont les théories et les réalisations ont une signification universelle exceptionnelle au XXe siècle. La série représente un « esprit nouveau » qui reflète une synthèse de l'architecture, de la peinture et de la sculpture. L'œuvre architecturale de Le Corbusier matérialise les idées de Le Corbusier, qui furent relayées avec force par les Congrès internationaux d'architecture moderne (CIAM) à partir de 1928.

L'œuvre architecturale de Le Corbusier est un reflet exceptionnel des tentatives du mouvement moderne d'inventer un nouveau langage architectural ; pour moderniser les techniques architecturales ; et pour répondre aux besoins sociaux et humains de l'homme moderne.

La contribution apportée par l'œuvre architecturale de Le Corbusier n'est pas simplement le fruit d'une réalisation exemplaire à un moment donné, mais la somme exceptionnelle de propositions construites et écrites, diffusées avec constance dans le monde entier sur une durée d'un demi-siècle.

2004 – Royal Exhibition Building and Carlton Gardens / Palais royal des expositions et jardins Carlton (Criterion ii)

Brief description

The Royal Exhibition Building and its surrounding Carlton Gardens were designed for the great international exhibitions of 1880 and 1888 in Melbourne. The building and grounds were designed by Joseph Reed. The building is constructed of brick and timber, steel and slate. It combines elements from the Byzantine, Romanesque, Lombardic and Italian Renaissance styles. The property is typical of the international exhibition movement which saw over 50 exhibitions staged between 1851 and 1915 in venues including Paris, New York, Vienna, Calcutta, Kingston (Jamaica) and Santiago (Chile). All shared a common theme and aims: to chart material and moral progress through displays of industry from all nations.

Briève description

Le Palais royal des expositions et les jardins Carlton qui l'entourent ont été conçus pour les grandes expositions internationales de 1880 et 1888 à Melbourne. Le bâtiment et le terrain ont été dessinés par Joseph Reed. Le bâtiment, construit en brique, bois, acier et ardoise, amalgame des traits byzantins, romans, lombards et de la Renaissance italienne. Cet ensemble est représentatif du mouvement des expositions internationales. Entre 1851 et 1915, plus de 50 d'entre elles furent organisées dans des villes comme Paris, New York, Vienne, Calcutta, Kingston (Jamaïque) et Santiago du Chili, sur la base d'un principe et d'un objectif commun : dresser un état des lieux du progrès en exposant les réalisations de tous les pays.

2007 – Sydney Opera House / Opéra de Sydney (Criterion i)

Brief Description

Inaugurated in 1973, the Sydney Opera House is a great architectural work of the 20th century that brings together multiple strands of creativity and innovation in both architectural form and structural design. A great urban sculpture set in a remarkable waterscape, at the tip of a peninsula projecting into Sydney Harbour, the building has had an enduring influence on architecture. The Sydney Opera House comprises three groups of interlocking vaulted 'shells' which roof two main performance halls and a restaurant. These shell-structures are set upon a vast platform and are surrounded by terrace areas that function as pedestrian concourses. In 1957, when the project of the Sydney Opera House was awarded by an international jury to Danish architect Jørn Utzon, it marked a radically new approach to construction.

Brève description

Inauguré en 1973, l'Opéra de Sydney fait partie des œuvres architecturales majeures du XXe siècle. Il associe divers courants innovants tant du point de vue de la forme architecturale que de la conception structurelle. Sculpture urbaine magnifique soigneusement intégrée dans un remarquable paysage côtier, à la pointe d'une péninsule qui s'avance dans le port de Sydney, cet édifice exerce depuis sa construction une grande influence sur le monde de l'architecture. L'Opéra de Sydney se compose de trois groupes de « coquilles » voûtées et entrelacées qui abritent les deux principaux lieux de représentation et un restaurant. Les « coquilles » disposées sur une vaste plate-forme sont entourées de terrasses qui font office de promenades piétonnes. En 1957, la décision prise par un jury international de confier la réalisation de l'Opéra de Sydney à l'architecte danois Jørn Utzon, a symbolisé la volonté d'adopter une démarche radicalement nouvelle en matière de construction.

2000 – Major Town Houses of Architect Victor Horta, Brussels/ Habitations majeures de l'architecte Victor Horta (Bruxelles) (Criteria i - ii - iv)

Brief Description

The four major town houses - Hôtel Tassel, Hôtel Solvay, Hôtel van Eetvelde, and Maison & Atelier Horta - located in Brussels and designed by the architect Victor Horta, one of the earliest initiators of Art Nouveau, are some of the most remarkable pioneering works of architecture of the end of the 19th century. The stylistic revolution represented by these works is characterised by their open plan, the diffusion of light, and the brilliant joining of the curved lines of decoration with the structure of the building.

Justification for Inscription

Criterion (i): The Town Houses of Victor Horta in Brussels are works of human creative genius, representing the highest expression of the influential Art Nouveau style in art and architecture.

Criterion (ii): The appearance of Art Nouveau in the closing years of the 19th century marked a decisive stage in the evolution of architecture, making possible subsequent developments, and the Town Houses of Victor Horta in Brussels bear exceptional witness to its radical new approach.

Criterion (iv): The Town Houses of Victor Horta are outstanding examples of Art Nouveau architecture brilliantly illustrating the transition from the 19th to the 20th century in art, thought, and society.

Brève description

Les quatre habitations majeures – l'Hôtel Tassel, l'Hôtel Solvay, l'Hôtel van Eetvelde et la maison et l'atelier de Horta – situées à Bruxelles et conçues par l'architecte Victor Horta, l'un des initiateurs de l'Art nouveau, font partie des œuvres d'architecture novatrices les plus remarquables de la fin du XIX^e siècle. La révolution stylistique qu'illustrent ces œuvres se caractérise par le plan ouvert, la diffusion de la lumière et la brillante intégration des lignes courbes de la décoration à la structure du bâtiment.

Justification d'inscription

Le Comité a décidé d'inscrire ce site sur la Liste du patrimoine mondial sur la base des critères (i), (ii) et (iv):

Critère (i): Les Habitations de Ville de Victor Horta à Bruxelles sont des œuvres du génie créateur représentant l'expression la plus aboutie de l'influence du style Art Nouveau dans l'art et l'architecture.

Critère (ii): L'apparition de l'Art Nouveau à la fin du XIX^e siècle, qui marqua une étape décisive dans l'évolution de l'architecture, annonce les changements futurs. Les habitations de Victor Horta à Bruxelles sont le témoignage exceptionnel de cette approche radicalement nouvelle.

Critère (iv): Les Habitations de Ville de Victor Horta sont des exemples exceptionnels de l'architecture Art Nouveau illustrant brillamment la transition du XIXe au XXe siècle en matière d'art, de pensée et de société.

2009 – Stoclet House / Palais Stoclet (Criteria i - ii)

Brief Description

When banker and art collector Adolphe Stoclet commissioned this house from one of the leading architects of the Vienna Secession movement, Josef Hoffmann, in 1905, he imposed neither aesthetic nor financial restrictions on the project. The house and garden were completed in 1911 and their austere geometry marked a turning point in Art Nouveau, foreshadowing Art Deco and the Modern Movement in architecture. Stoclet House is one of the most accomplished and homogenous buildings of the Vienna Secession, and features works by Koloman Moser and Gustav Klimt, embodying the aspiration of creating a 'total work of art' (Gesamtkunstwerk). Bearing testimony to artistic renewal in European architecture, the house retains a high level of integrity, both externally and internally as it retains most of its original fixtures and furnishings.

Criterion (i): Created under the supervision of the architect and interior designer Josef Hoffmann, the Stoclet House is a masterpiece of the creative genius of the Vienna Secession through its aesthetic and conceptual programme of Gesamtkunstwerk, through its architectural vocabulary, through its originality, and through the exceptional quality of its decoration, of its furniture, of its works of art and of its garden. It is a remarkably well conserved symbol of constructive and aesthetic modernity in the west at the start of the 20th century.

Criterion (ii): Drawing on the values of the Vienna Secession and its many artists, including Koloman Moser and Gustav Klimt, the Stoclet House was recognised from the beginning as one of the most representative and refined works of this school. Created in Brussels, a key location for Art Nouveau, it exercised a considerable influence on modernism in architecture and on the birth of Art Deco.

Brève description

Le Palais a été conçu en 1905 à la demande du banquier et collectionneur Adolphe Stoclet par l'un des chefs de file du mouvement artistique de la Sécession viennoise, l'architecte Josef Hoffman. Ce dernier a pu travailler sans limite financière ou esthétique. Avec leur géométrisme épuré, le palais et le jardin (terminés en 1911) marquent un changement radical au sein de l'Art nouveau, changement qui annonce l'Art déco et le mouvement moderniste en architecture. Le Palais Stoclet est une des réalisations les plus abouties de la Sécession viennoise. Il abrite des œuvres de Koloman Moser et de Gustav Klimt, liées à la conception du Gesamtkunstwerk (architecture, sculpture, peinture et arts décoratifs s'intègrent dans une même œuvre). Le Palais témoigne du renouveau artistique de l'architecture européenne et présente un haut niveau d'intégrité dans ses dimensions d'architecture extérieure, d'architecture et de décoration intérieures, avec des meubles et objets originaux.

Critère (i): Réalisé sous la conduite de l'architecte et décorateur Josef Hoffman, le palais Stoclet représente un chef-d'œuvre du génie créateur de la Sécession viennoise, par son programme esthétique et conceptuel d'art total (Gesamtkunstwerk), par son vocabulaire architectural, par l'originalité et la qualité exceptionnelle de sa décoration, de son mobilier, de ses œuvres d'art et de son jardin. Il constitue un symbole de la modernité constructive et esthétique, en Occident au début du XXe siècle, remarquablement bien conservé.

Critère (ii): Nourri des valeurs de la Sécession viennoise et de ses nombreux artistes, dont Koloman Moser et Gustav Klimt, le palais Stoclet apparaît dès sa création comme l'une des œuvres les plus représentatives et des plus raffinées de cette école. Réalisé à Bruxelles, au sein d'un haut lieu de l'Art nouveau, il exerce alors une influence considérable sur la recherche moderniste en architecture, et sur la naissance de l'Art déco.

Brazil / Bresil

1987 – Brasilia / Brasilia (Criteria i - iv)

Brief description

Brasilia, a capital created ex nihilo in the centre of the country in 1956, was a landmark in the history of town planning. Urban planner Lucio Costa and architect Oscar Niemeyer intended that every element - from the layout of the residential and administrative districts (often compared to the shape of a bird in flight) to the symmetry of the buildings themselves - should be in harmony with the city's overall design. The official buildings, in particular, are innovative and imaginative.

Brièvemente description

Brasília, capitale créée ex nihilo au centre du pays en 1956-1960, a été un événement majeur dans l'histoire de l'urbanisme. L'urbaniste Lucio Costa et l'architecte Oscar Niemeyer ont voulu que tout, depuis le plan général des quartiers administratifs et résidentiels - souvent comparé à la forme d'un oiseau - jusqu'à la symétrie des bâtiments eux-mêmes, reflète la conception harmonieuse de la ville dont les bâtiments officiels frappent par leur aspect novateur.

2016 - Pampulha Modern Ensemble, Brazil (Criterion i, ii, iv)

Brief description

The Pampulha Modern Ensemble was the centre of a visionary garden city project created in 1940 at Belo Horizonte, the capital of Minas Gerais State. Designed around an artificial lake, this cultural and leisure centre included a casino, a ballroom, the Golf Yacht Club and the São Francisco de Assis church. The buildings were designed by architect Oscar Niemeyer, in collaboration with innovative artists. The Ensemble comprises bold forms that exploit the plastic potential of concrete, while fusing architecture, landscape design, sculpture and painting into a harmonious whole. It reflects the influence of local traditions, the Brazilian climate and natural surroundings on the principles of modern architecture.

Justification for inscription

Criterion i : Niemeyer, Burle Marx and Portinari collectively delivered a landscape ensemble that as a whole is an outstanding for the way it manifests a new fluid modern architectural language fused with the plastic arts and design, and one that interacts with its landscape context.

Criterion ii : The Pampulha Modern Ensemble was linked to reciprocal influences between European and North America and the Latin American periphery and particularly to a poetic reaction to the perceived austerity of modern European architecture.

In establishing a synthesis between local regional practices and universal trends, as well as fostering dynamic links between architecture, landscape design and the plastic arts, Pampulha inaugurated a new direction in modern architecture which subsequently was used to assert new national identities in recently independent Latin American countries.

Criterion iv : The Pampulha ensemble and its innovative architectural and landscape concepts reflects a particular stage in architectural history in South America, which in turn reflects wider socio-economic changes in society beyond the region. The economic crises of 1929 prompted demands for people to have greater inclusion in nation building. These circumstances influenced the design of the new garden city neighbourhood of Belo Horizonte as a place that could reflect creative and cultural ‘autonomy’ through innovative architectural buildings designed for public use, set in a designed ‘natural’ landscape, well endowed with public spaces for leisure and exercise.

Brièvre description

L'Ensemble moderne de Pampulha a été le centre d'un projet visionnaire de cité-jardin créé en 1940 à Belo Horizonte, capitale de l'état du Minas Gerais. Conçu autour d'un lac artificiel, ce centre culturel et de loisirs se composait d'un casino, d'une salle de bal, d'un Golf & Yacht Club et de l'église São Francisco de Assis. Les bâtiments ont été conçus par l'architecte Oscar Niemeyer, en collaboration avec des artistes novateurs. L'Ensemble présente des formes audacieuses qui exploitent les propriétés plastiques du béton et tout en fusionnant l'architecture, le paysagisme, la sculpture et la peinture – pour créer un tout harmonieux. Il témoigne de l'influence des traditions locales, du climat et de l'environnement naturel brésiliens sur les principes de l'architecture moderne.

Justification d'inscription

Critère (i) : Niemeyer, Burle Marx et Portinari ont produit collectivement un ensemble paysager exceptionnel pour la manière dont il manifeste un nouveau langage architectural moderne fluide fusionné avec les arts plastiques et le design, et qui interagit avec son contexte paysager.

Critère (ii) : L'ensemble moderne de Pampulha était lié à des influences réciproques entre l'Europe et l'Amérique du Nord ainsi que la périphérie latino-américaine, et particulièrement à une réaction poétique face à l'austérité perçue de l'architecture moderne européenne.

En établissant une synthèse entre les pratiques locales régionales et des tendances universelles, ainsi qu'en stimulant des liens dynamiques entre architecture, paysagisme et arts plastiques, Pampulha a inauguré une nouvelle direction dans l'architecture moderne qui fut ensuite utilisée pour affirmer les nouvelles identités nationales dans les pays d'Amérique latine indépendants depuis peu.

Critère (iv) : L'ensemble de Pampulha et ses concepts architecturaux et paysagers novateurs illustrent une période particulière dans l'histoire de l'architecture en Amérique du Sud, qui reflète à son tour des changements socioéconomiques plus larges dans la société, et pas seulement dans la région. La crise économique de 1929 a fait naître une demande des citoyens d'être mieux intégrés dans le processus de construction des nations. Ces circonstances ont influencé la conception du nouveau quartier de cité-jardin de Belo Horizonte comme un endroit qui pouvait traduire une « autonomie » créative et culturelle par des édifices architecturaux novateurs conçus pour un usage public, installés dans un aménagement paysager « naturel » et bien doté d'espaces publics de loisirs et d'exercice physique.

Chile / Chili

2003 – Historic Quarter of the Seaport City of Valparaíso / Quartier historique de la ville portuaire de Valparaiso (Criterion iii)

Brief description

The colonial city of Valparaíso presents an excellent example of late 19th-century urban and architectural development in Latin America. In its natural amphitheatre-like setting, the city is characterized by a vernacular urban fabric adapted to the hillsides that are dotted with a great variety of church spires. It contrasts with the geometrical layout utilized in the plain. The city has well preserved its interesting early industrial infrastructures, such as the numerous 'elevators' on the steep hillsides.

Briève description

La ville coloniale de Valparaíso offre un exemple de développement urbain et architectural de la fin du XIX^e siècle en Amérique latine. Dans son cadre naturel en forme d'amphithéâtre, la ville se caractérise par un tissu urbain vernaculaire adapté aux collines, en contraste avec le dessin géométrique employé en plaine, et présente une unité formelle sur laquelle se détache une grande diversité de clochers d'églises. Valparaíso a bien préservé d'intéressantes infrastructures du début de l'ère industrielle, tels les nombreux « funiculaires » à flanc de colline.

Cuba

2005 – Urban Historic Centre of Cienfuegos / Centre historique urbain de Cienfuegos / Centro histórico urbano de Cienfuegos (Criteria ii - v)

Brief description

The colonial town of Cienfuegos was founded in 1819 in the Spanish territory but was initially settled by immigrants of French origin. It became a trading place for sugar cane, tobacco and coffee. Situated on the Caribbean coast of southern-central Cuba at the heart of the country's sugar cane, mango, tobacco and coffee production area, the town first developed in the neoclassical style. It later became more eclectic but retained a harmonious overall townscape. Among buildings of particular interest are the Government Palace (City Hall), San Lorenzo School, the Bishopric, the Ferrer Palace, the former lyceum, and some residential houses. Cienfuegos is the first, and an outstanding example of an architectural ensemble representing the new ideas of modernity, hygiene and order in urban planning as developed in Latin America from the 19th century.

Briève description

La ville coloniale de Cienfuegos fut fondée en 1819, à l'époque où l'île était sous domination espagnole, mais elle fut d'abord colonisée par des immigrés d'origine française. Elle devint ensuite un centre de négoce de la canne à sucre, du tabac et du café. L'architecture de cette ville située sur la côte caraïbe, dans la partie centrale du sud de Cuba, au cœur de la zone de culture de la canne à sucre, de la mangue, du tabac et du café, fut d'abord de style néoclassique, puis devint plus éclectique, le paysage urbain conservant néanmoins une harmonie d'ensemble. Parmi les bâtiments les plus intéressants: le palais du gouvernement (Hôtel de Ville), l'école San Lorenzo, l'Évêché, le palais Ferrer, l'ancien Lycée et quelques demeures. Cienfuegos est le premier et l'un des plus

remarquables exemples d'ensemble architectural traduisant les nouvelles notions de modernité, d'hygiène et d'ordre en matière d'urbanisme tel qu'il s'est développé en Amérique Latine à partir du XIXe siècle.

Breve descripción

La ciudad colonial de Cienfuegos fue fundada en 1819 en territorio español pero tomada inicialmente por los inmigrantes del origen francés. Se convirtió en un sitio de comercio de tabaco, café y caña de azúcar. Situada en la costa del Caribe de Cuba meridional-central, en el corazón del área de la producción de la caña de azúcar, de mango, de tabaco y de café, la ciudad primero fue construida en estilo neoclásico y más adelante en estilo ecléctico pero conservando una armonía de conjunto. Entre los edificios de interés particular están: el Palacio del Gobierno, la escuela del San Lorenzo, el Bishopric, el Palacio de Ferrer, el primer Liceo, y algunas casas residenciales.

Cienfuegos es el primer y excepcional ejemplo de conjunto arquitectónico representativo de las nuevas ideas de modernidad, de higiene y del orden en el planeamiento urbano según lo desarrollado en América Latina a partir del siglo XIX.

Czech Republic / République Tchèque

2001 – Tugendhat Villa in Brno / Villa Tugendhat à Brno (Criteria ii - iv)

Brief Description

The Tugendhat Villa in Brno, designed by the architect Mies van der Rohe, is an outstanding example of the international style in the modern movement in architecture as it developed in Europe in the 1920s. Its particular value lies in the application of innovative spatial and aesthetic concepts that aim to satisfy new lifestyle needs by taking advantage of the opportunities afforded by modern industrial production.

Justification for Inscription

Criterion i : The Tugendhat Villa is a masterpiece of the Modern Movement in architecture. Criterion ii The German architect Mies van der Rohe applied the radical new concepts of the Modern Movement triumphantly to the Tugendhat Villa to the design of residential buildings. Criterion iv Architecture was revolutionized by the Modern Movement in the 1920s and the work of Mies van der Rohe, epitomized by the Tugendhat Villa, played a major role in its worldwide diffusion and acceptance.

Brève description

La villa Tugendhat à Brno, conçue par l'architecte Mies van der Rohe, est un exemple remarquable du style international dans le mouvement moderne en architecture tel qu'il s'est développé en Europe au cours des années 20. Sa valeur particulière réside dans la mise en œuvre de concepts spatiaux et esthétiques novateurs, visant à satisfaire les nouveaux besoins liés au mode de vie, tout en tirant parti des moyens offerts par la production industrielle moderne.

Justification d'inscription

Critère i : La villa Tugendhat est un chef d'œuvre du mouvement moderne en architecture. Critère ii Avec la villa Tugendhat, l'architecte allemand Mies van der Rohe a appliqué les nouveaux concepts radicaux d'un mouvement moderne triomphant à la conception d'édifices résidentiels. Critère iv Dans les années 20, le mouvement moderne a révolutionné l'architecture, et l'œuvre de Mies van der Rohe, dont la villa Tugendhat est le plus bel exemple, a joué un rôle fondamental dans sa diffusion et dans sa reconnaissance mondiale.

Eritrea

2017 – Asmara: a Modernist City of Africa (Criteria ii - iv)

Brief Description

Located at over 2,000 m above sea level, the capital of Eritrea developed from the 1890s onwards as a military outpost for the Italian colonial power. After 1935, Asmara underwent a large scale programme of construction applying the Italian rationalist idiom of the time to governmental edifices, residential and commercial buildings, churches, mosques, synagogues, cinemas, hotels, etc. The property encompasses the area of the city that resulted from various phases of planning between 1893 and 1941, as well as the indigenous unplanned neighbourhoods of Arbate Asmera and Abbashawel. It is an exceptional example of early modernist urbanism at the beginning of the 20th century and its application in an African context.

Justification for Inscription

Criterion (ii): Asmara, a Modernist City of Africa, represents an outstanding example of the transposition and materialization of ideas about planning in an African context and were used for functional and segregation purposes. The adaptation to the local context is reflected in the urban layout and functional zoning, and in the architectural forms, which, although expressing a modernist and rationalist idiom, and exploiting modern materials and techniques, also relied on and borrowed heavily from local morphologies, construction methods, materials, skills and labour. Asmara's creation and development contributed significantly to Eritrea's particular response to the tangible legacies of its colonial past. Despite the evidence of its colonial imprint, Asmara has been incorporated into the Eritrean identity, acquiring important meaning during the struggle for self-determination that motivated early efforts for its protection.

Criterion (iv): Asmara's urban layout and character, in combining the orthogonal grid with radial street patterns, and picturesque elements integrating topographical features, taking into account local cultural conditions created by different ethnic and religious groups, and using the principle of zoning for achieving racial segregation and functional organisation, bears exceptional witness to the development of the new discipline of urban planning at the beginning of the 20th century and its application in an African context, to serve the Italian colonial agenda. This hybrid plan, that combined the functional approach of the grid with the picturesque and the creation of scenic spaces, vistas, civic plaza and monumental places, served the functional, civic and symbolic requirements for a colonial capital. The architecture of Asmara complements the plan and forms a coherent whole, although reflecting eclecticism and Rationalist idioms, and is one of the most complete and intact collections of modernist/rationalist architecture in the world.

Brève description

Située à plus de 2 000 m au-dessus du niveau de la mer, la capitale de l'Érythrée s'est développée à partir des années 1890 comme un avant-poste militaire de la puissance coloniale italienne. Après 1935, Asmara connaît un programme de construction à grande échelle appliquant le style rationaliste italien de l'époque aux édifices gouvernementaux, aux bâtiments résidentiels et commerciaux, aux églises, mosquées, synagogues, cinémas, hôtels, etc. Le bien comprend la zone de la ville résultant

des différentes phases de planification urbaine entre 1893 et 1941, ainsi que les quartiers autochtones non planifiés d'Arbate Asmera et d'Abbashawel. Il s'agit d'un témoignage exceptionnel du début de l'urbanisme moderne, à l'aube du xxe siècle, et de son application dans un contexte africain.

Justification d'inscription

Critère (ii): Asmara, une ville moderniste d'Afrique, représente un exemple exceptionnel de transposition et de matérialisation, dans le contexte africain, de concepts urbanistiques qui furent utilisés à des fins fonctionnelles et de ségrégation. L'adaptation au contexte local est reflétée dans le tracé urbain et le zonage fonctionnel, ainsi que dans les formes architecturales qui, bien qu'exprimant un langage moderniste et rationaliste, et exploitant des matériaux et des techniques modernes, se sont appuyées et ont largement emprunté aux morphologies, méthodes de construction, matériaux, compétences et main-d'œuvre locaux. La création et le développement d'Asmara contribuèrent grandement à la réponse particulière de l'Érythrée à l'héritage matériel de son passé colonial. Malgré cette empreinte coloniale évidente, Asmara a été intégrée dans l'identité érythréenne, acquérant une signification importante lors de la lutte pour l'autodétermination qui a motivé des efforts initiaux en faveur de sa préservation.

Critère (iv): Le tracé et le caractère urbains d'Asmara, par l'association du plan orthogonal avec schéma radial des rues, avec des éléments pittoresques intégrant des caractéristiques topographiques et prenant en compte les conditions culturelles locales créées par différents groupes ethniques et religieux, et l'utilisation du principe de zonage pour réaliser une ségrégation raciale et une organisation fonctionnelle, apportent un témoignage exceptionnel sur le développement de la nouvelle discipline qu'était l'urbanisme au début du XXe siècle et sur son application à un contexte africain pour servir les intérêts coloniaux italiens. Ce plan hybride, qui associait l'approche fonctionnelle de la grille avec le pittoresque et la création d'espaces panoramiques, de points de vue, de places publiques et monumentales, répondait aux exigences fonctionnelles, civiques et symboliques d'une capitale coloniale. L'architecture d'Asmara complète le plan et forme un tout cohérent, bien que reflétant les langages éclectique et rationaliste, et constitue l'un des ensembles les plus complets et intacts d'architecture moderniste et rationaliste au monde.

France

2005 – Le Havre, the City Rebuilt by Auguste Perret / Le Havre, le ville reconstruite par Auguste Perret (Criteria ii - iv)

Brief Description

The city of Le Havre, on the English Channel in Normandy, was severely bombed during the Second World War. The destroyed area was rebuilt according to the plan of a team headed by Auguste Perret, from 1945 to 1964. The site forms the administrative, commercial and cultural centre of Le Havre. Amongst many reconstructed cities, Le Havre is exceptional for its unity and integrity. It combines a reflection of the earlier pattern of the town and its extant historic structures with the new ideas of town planning and construction technology. It is an outstanding post-war example of urban planning and architecture based on the unity of methodology and the use of prefabrication, the systematic utilization of a modular grid, and the innovative exploitation of the potential of concrete.

Justification for Inscription

Criterion (ii): The post-war reconstruction plan of Le Havre is an outstanding example and a landmark of the integration of urban planning traditions and a pioneer implementation of modern developments in architecture, technology, and town planning.

Criterion (iv): Le Havre is an outstanding post-war example of urban planning and architecture based on the unity of methodology and system of prefabrication, the systematic use of a modular grid and the innovative exploitation of the potential of concrete.

Brève description

La ville du Havre, au bord de la Manche en Normandie, a été lourdement bombardée pendant la Seconde Guerre mondiale. La zone détruite a été reconstruite entre 1945 et 1964 d'après le plan d'une équipe dirigée par Auguste Perret. Le site forme le centre administratif, commercial et culturel du Havre. Parmi les nombreuses villes reconstruites, le Havre est exceptionnelle pour son unité et son intégrité, associant un reflet du schéma antérieur de la ville et de ses structures historiques encore existantes aux idées nouvelles en matière d'urbanisme et de technologie de construction. Il s'agit d'un exemple remarquable de l'architecture et l'urbanisme de l'après-guerre, fondé sur l'unité de méthodologie et le recours à la préfabrication, l'utilisation systématique d'une trame modulaire, et l'exploitation novatrice du potentiel du béton.

Justification d'inscription

Critère (ii): Le plan de reconstruction d'après-guerre du Havre est un exemple exceptionnel et une étape importante de l'intégration des traditions urbanistiques à une mise en œuvre pionnière des développements modernes qui se sont produits dans l'architecture, la technologie et l'urbanisme.

Critère (iv): Le Havre est un exemple d'après-guerre exceptionnel de l'urbanisme et de l'architecture, basé sur l'unité de la méthodologie et sur le système de la préfabrication, l'utilisation systématique d'une trame à module et l'exploitation novatrice des potentiels du béton.

Germany / Allemagne

1990, 1992, 1999 – Palaces and Parks of Potsdam and Berlin / Châteaux et parcs de Potsdam et Berlin (Criteria i - ii - iv)

Brief Description

With 500 ha of parks and 150 buildings constructed between 1730 and 1916, Potsdam's complex of palaces and parks forms an artistic whole, whose eclectic nature reinforces its sense of uniqueness. It extends into the district of Berlin-Zehlendorf, with the palaces and parks lining the banks of the River Havel and Lake Glienicker. Voltaire stayed at the Sans-Souci Palace, built under Frederick II between 1745 and 1747.

Brève Description

Avec ses 500 ha de parcs, ses 150 constructions édifiées entre 1730 et 1916, l'ensemble des châteaux et parcs de Potsdam constitue une entité artistique exceptionnelle dont le caractère éclectique renforce l'unicité. Cet ensemble est prolongé, dans le district de Berlin-Zehlendorf, par les châteaux et les parcs qui s'étendent sur les rives de la Havel et du lac de Glienicker. Voltaire séjourna dans le palais de Sans-Souci, construit sous Frédéric II entre 1745 et 1757.

1996 – Bauhaus and its Sites in Weimar and Dessau / Le Bauhaus et ses sites à Weimar et Dessau (Criteria i -ii - iv - vi)

Brief Description

Between 1919 and 1933, the Bauhaus School, based first in Weimar and then in Dessau, revolutionized architectural and aesthetic concepts and practices. The buildings put up and decorated by the school's professors (Walter Gropius, Hannes Meyer, Laszlo Moholy-Nagy and Wassily Kandinsky) launched the Modern Movement, which shaped much of the architecture of the 20th century.

Justification for Inscription

The Committee decided to inscribe the nominated property on the basis of cultural criteria (ii), (iv) and (vi) considering that the site is of outstanding universal value since these buildings are the seminal works of the Bauhaus architectural school, the foundation of the Modern Movement which was to revolutionize artistic and architectural thinking and practice in the twentieth century. The Committee also noted that this type of inscription testifies a better recognition of the 20th century heritage.

Brève Description

Entre 1919 et 1933, l'école du Bauhaus, installée d'abord à Weimar puis à Dessau, a révolutionné l'ensemble des conceptions et des productions architecturales et esthétiques. Les bâtiments construits et décorés par les professeurs de l'école (Walter Gropius ou Hannes Meyer, Laszlo Moholy-Nagy ou Vassily Kandinsky) ont inauguré le « mouvement moderne » qui a modelé l'aspect architectural de notre siècle.

Justification d'inscription

Le Comité a décidé d'inscrire le bien proposé sur la base des critères culturels (ii), (iv) et (vi), considérant que le site possède une valeur universelle exceptionnelle étant donné que ses bâtiments sont les œuvres fondatrices de l'école d'architecture du Bauhaus, à l'origine du Mouvement Moderne qui allait révolutionner les conceptions et les productions architecturales et artistiques du 20e siècle.

1999 – Museumsinsel (Museum Island), Berlin / Museumsinsel (Île des musées), Berlin (Criteria ii - iv)

Brief Description

The museum as a social phenomenon owes its origins to the Age of Enlightenment in the 18th century. The five museums on the Museumsinsel in Berlin, built between 1824 and 1930, are the realization of a visionary project and show the evolution of approaches to museum design over the course of the 20th century. Each museum was designed so as to establish an organic connection with the art it houses. The importance of the museum's collections – which trace the development of civilizations throughout the ages – is enhanced by the urban and architectural quality of the buildings.

Justification for Inscription

Criterion (ii): The Berlin Museumsinsel is a unique ensemble of museum buildings, which illustrates the evolution of modern museum design over more than a century.

Criterion (iv): The modern museum is a social phenomenon that owes its origins to the Age of Enlightenment, and its extension to all people to the French Revolution. The Museumsinsel is the most outstanding example of this concept given material form and placed in a symbolic central urban setting.

Brève Description

Le musée d'art en tant que phénomène social doit ses origines à l'époque des Lumières, au XVIII^e siècle. Les cinq musées de la Museumsinsel à Berlin, construits entre 1824 et 1930, représentent la réalisation d'un projet visionnaire et l'évolution de la conception des musées au cours de ce siècle. Chaque musée ayant été pensé en rapport organique avec les collections qu'il abrite, l'importance des collections – qui témoignent de l'évolution de la civilisation – se double d'une grande valeur urbanistique et architecturale.

Justification d'inscription

Critère (ii) : La Museumsinsel de Berlin est un ensemble unique de musées illustrant l'évolution de la conception des musées modernes sur plus d'un siècle.

Critère (iv) : Le musée moderne est un phénomène social qui doit ses origines à l'époque des Lumières et son extension universelle à la Révolution française. La Museumsinsel est l'exemple le plus remarquable de ce concept ayant pris forme dans un cadre urbain symbolique.

2001 - Zollverein Coal Mine Industrial Complex in Essen, Germany (criteria ii, iii)

Brief Description

The Zollverein XII Coal Mine Industrial Complex is an important example of a European primary industry of great economic significance in the 19th and 20th centuries. It consists of the complete installations of a historical coal-mining site: the pits, coking plants, railway lines, pit heaps, miner's housing and consumer and welfare facilities. The mine is especially noteworthy of the high architectural quality of its buildings of the Modern Movement.

Zollverein XII was created at the end of a phase of political and economic upheaval and change in Germany, which was represented aesthetically in the transition from Expressionism to Cubism and Functionalism. At the same time, Zollverein XII embodies this short economic boom between the two World Wars, which has gone down in history as the "Roaring Twenties." Zollverein is also, and by no means least, a monument of industrial history reflecting an era, in which, for the first time, globalisation and the worldwide interdependence of economic factors played a vital part.

The architects Fritz Schupp and Martin Kemmer developed Zollverein XII in the graphic language of the Bauhaus as a group of buildings which combined form and function in a masterly way.

Justification for Inscription

Criterion (ii): The Zollverein XII Coal Mine Industrial Complex is an exceptional industrial monument by virtue of the fact that its buildings are outstanding examples of the application of the design concepts of the Modern Movement in architecture in a wholly industrial context.

Criterion (iii): The technological and other structures of Zollverein XII are representative of a crucial period in the development of traditional heavy industries in Europe, which were reinforced through the parallel development and application of Modern Movement architectural designs of outstanding quality.

Brève Description

Le complexe industriel de la mine de charbon de Zollverein XII est un exemple important de la première industrie européenne ayant eu une grande importance aux XIX^e et XX^e siècles. Il comprend les installations complètes d'un site historique d'extraction du charbon : les puits, cokeries, lignes de chemin de fer, terrils, maisons de mineurs et infrastructures de consommation et service d'aide sociale. La mine est particulièrement remarquable pour la grande qualité architecturale de ses bâtiments du mouvement moderne.

Zollverein XII fut créée à la fin d'une phase de bouleversements politiques et économiques en Allemagne, qui trouva sa traduction esthétique dans la transition de l'Expressionnisme au Cubisme et au Fonctionnalisme. Par ailleurs, Zollverein XII est la vivante illustration de cette courte période de prospérité économique de l'entre-deux guerres, entrée dans l'histoire sous le nom des « Années Folles ». Cependant, Zollverein est aussi, un monument historique industriel, reflet d'une époque où la mondialisation et l'interdépendance mondiale des facteurs économiques ont pour la première fois joué un rôle capital.

Les architectes Fritz Schupp et Martin Kemmer ont conçu Zollverein XII, dans le langage graphique du Bauhaus, comme un groupe d'édifices qui combinent magistralement forme et fonction.

Justification d'inscription

Critère (ii) : Le complexe industriel de la mine de charbon de Zollverein XII est un monument industriel remarquable car ses bâtiments sont des exemples exceptionnels de la mise en application des concepts de design du mouvement moderne en architecture dans un contexte purement industriel.

Critère (iii) : Les structures technologiques et autres de Zollverein XII sont représentatives d'une période cruciale dans le développement des industries lourdes traditionnelles en Europe, qui furent renforcées par le développement parallèle et l'application de conceptions architecturales d'une qualité exceptionnelle du mouvement moderne.

2008 – Berlin Modernism Housing Estates / Cités du modernisme de Berlin

(Criteria ii - iv)

Brief Description

Berlin Modernism Housing Estates. The property consists of six housing estates that testify to innovative housing policies from 1910 to 1933, especially during the Weimar Republic, when the city of Berlin was particularly progressive socially, politically and culturally. The property is an outstanding example of the building reform movement that contributed to improving housing and living conditions for people with low incomes through novel approaches to town planning, architecture and garden design. The estates also provide exceptional examples of new urban and architectural typologies, featuring fresh design solutions, as well as technical and aesthetic innovations. Bruno Taut, Martin Wagner and Walter Gropius were among the leading architects of these projects which exercised considerable influence on the development of housing around the world.

Criterion (ii): The six Berlin housing estates provide an outstanding expression of a broad housing reform movement that made a decisive contribution to improving housing and living conditions in Berlin. Their quality of urban, architectural and garden design, as well as the housing standards developed during the period, served as guidelines for social housing constructed since then, both in and outside Germany.

Criterion (iv): The six Berlin housing estates are exceptional examples of new urban and architectural typologies, designed in the search for improved social living conditions. Fresh design solutions and technical and aesthetic innovations were incorporated by the leading modern architects who participated in their design and construction.

The six properties were selected out of the ensemble of housing estates of the period existing in the city, on the basis of their historical, architectural, artistic and social significance and the fact that, due to their location, they suffered little damage during World War II. Even though minor reconstruction and interior changes were carried out in the post war period, restoration works within the framework of the protection law of 1975 and their current state of conservation achieve a high standard of integrity and authenticity.

Adequate protection is ensured by the legislation in place, especially by the Berlin Law on the Preservation of Historic Places and Monuments (1995). The properties, buildings and open spaces, are in a good state of conservation. The management system, including policies, structures and plans, proves to be adequate and includes all concerned stakeholders.

Brève Description

Les Cités du style moderne de Berlin, en Allemagne, comprennent six ensembles de logements qui témoignent de la politique de l'habitat innovante de 1910 à 1933, spécialement durant la République de Weimar, lorsque la ville de Berlin était à l'avant-garde sur le plan social, politique et culturel. Ces cités constituent un exemple exceptionnel de l'évolution des logements sociaux qui a contribué à

améliorer l'habitat et les conditions de vie des personnes à faibles revenus, grâce à des approches novatrices en matière d'urbanisme, d'architecture et de conception des jardins. Le site offre des exemples remarquables de nouveaux types urbains et architecturaux avec des solutions inédites en matière de design et des innovations techniques et esthétiques. Bruno Taut, Martin Wagner et Walter Gropius ont été parmi les principaux architectes de ces projets qui ont exercé une influence considérable sur le développement de l'habitat partout dans le monde.

Critère (ii): Les six cités de Berlin expriment de manière exceptionnelle le vaste mouvement de réforme des logements, qui contribua de manière significative à l'amélioration des conditions de logement et de vie à Berlin. La qualité de la conception urbaine, architecturale et des jardins de ces cités, ainsi que les normes élaborées pour les logements pendant cette période, ont fixé des orientations, sources d'inspiration pour la construction ultérieure de logements sociaux en Allemagne et dans le monde.

Critère (iv): Les six cités de Berlin sont des exemples exceptionnels des nouvelles typologies urbaines et architecturales, visant à instaurer de meilleures conditions de vie sur le plan social. Des solutions novatrices en matière de concept, de technique et d'esthétique furent adoptées par les grands architectes modernes qui participèrent à la conception et à la construction.

Les six biens ont été sélectionnés parmi un ensemble de cités de la ville datant de cette période en fonction de leur importance historique, architecturale, artistique et sociale et parce qu'elles avaient été peu endommagées pendant la Seconde Guerre mondiale du fait de leur lieu d'implantation. Malgré les reconstructions mineures et les modifications intérieures de la période d'après-guerre, les travaux de restauration réalisés dans le cadre de la loi sur la protection de 1975 et leur état actuel de conservation permettent d'atteindre un haut niveau d'intégrité et d'authenticité.

La protection appropriée est garantie par la législation en place, notamment par la loi de Berlin relative à la conservation des sites et monuments historiques (1995). Les biens, bâtiments et espaces ouverts, sont dans un bon état de conservation. Le système de gestion, y compris les politiques, structures et plans, s'avère être approprié et intègre toutes les parties prenantes concernées.

2011 – Fagus Factory in Alfeld / Usine Fagus à Alfeld (Criteria ii - iv)

Brief Description

Fagus Factory in Alfeld is a 10-building complex - began around 1910 to the design of Walter Gropius, which is a landmark in the development of modern architecture and industrial design. Serving all stages of manufacture, storage and dispatch of lasts used by the shoe industry, the complex, which is still operational today, is situated in Alfeld an der Leine in Lower Saxony. With its groundbreaking vast expanses of glass panels and functionalist aesthetics, the complex foreshadowed the work of the Bauhaus school and is a landmark in the development of architecture in Europe and North America.

Brève description

Ce complexe de 10 bâtiments, conçu au début des années 1910 par Walter Gropius, témoigne du développement de l'architecture moderne et du design industriel. La succession des bâtiments est organisée pour accompagner le processus industriel, depuis les matériaux bruts jusqu'à la fabrication et le stockage des chaussures. Situé à Alfeld an der Leine, en Basse-Saxe, l'ensemble est encore en activité. Avec ses verrières révolutionnaires et son esthétique fonctionnaliste, l'usine annonce le mouvement moderniste et l'école du Bauhaus. Il s'agit d'un jalon important de l'histoire de l'architecture en Europe et en Amérique du Nord.

2015 - Speicherstadt and Kontorhaus District with Chilehaus (criteria iv)

Brief Description

Speicherstadt and the adjacent Kontorhaus district are two densely built urban areas in the centre of the port city of Hamburg. Speicherstadt, originally developed on a group of narrow islands in the Elbe River between 1885 and 1927, was partly rebuilt from 1949 to 1967. It is one of the largest coherent historic ensembles of port warehouses in the world (300,000 m²). It includes 15 very large warehouse blocks as well as six ancillary buildings and a connecting network of short canals. Adjacent to the modernist Chilehaus office building, the Kontorhaus district is an area of over five hectares featuring six very large office complexes built from the 1920s to the 1940s to house port-related businesses. The complex exemplifies the effects of the rapid growth in international trade in the late 19th and early 20th centuries.

Justification for Inscription

Criterion (iv): Speicherstadt and Kontorhaus District with Chilehaus contains outstanding examples of the types of buildings and ensembles that epitomize the consequences of the rapid growth in international trade in the late 19th and early 20th centuries. Their high-quality designs and functional construction, in the guise of historicism and Modernism, respectively, make this an exceptional ensemble of maritime warehouses and Modernist office buildings.

Brève Description

La Speicherstadt et le quartier Kontorhaus sont deux zones urbaines centrales de la ville portuaire allemande de Hambourg. La Speicherstadt, qui s'est développée à l'origine sur un groupe d'îles étroites de l'Elbe, entre 1885 et 1927 (partiellement reconstruite de 1949 à 1967), est l'un des plus grands complexes d'entrepôts portuaires historiques unifiés au monde (300 000 m²). Il comprend quinze très grands entrepôts et six bâtiments annexes, bâtis sur un réseau de courts canaux. Adossé à l'immeuble moderniste de la Chilehaus, le quartier Kontorhaus, contigu, est une zone de plus de 5 hectares, qui comporte six très grands complexes de bureaux construits entre les années 1920 et 1940 pour accueillir des entreprises se livrant à des activités liées au port. L'ensemble du bien illustre parfaitement les conséquences de la croissance rapide du commerce international à la fin du XIX^e et au début du XX^e siècle.

Justification d'inscription

Critère (iv): La Speicherstadt et le quartier Kontorhaus avec la Chilehaus contiennent des exemples exceptionnels de types de bâtiments et d'ensembles qui illustrent parfaitement les conséquences de la croissance rapide du commerce international à la fin du XIX^e et au début du XX^e siècle. Leur conception de grande qualité et leur construction fonctionnelle, sous l'apparence respective de l'historicisme et du modernisme, en font un ensemble exceptionnel d'entrepôts maritimes et d'immeubles de bureaux modernistes.

Germany / Poland – Allemagne / Pologne

2004 – Muskauer Park / Park Mużakowski - Parc de Muskau / Parc Mužakowski (Criteria i - iv)

Brief Description

A landscaped park of 559.9 ha astride the Neisse River and the border between Poland and Germany, it was created by Prince Hermann von Pückler-Muskau from 1815 to 1844. Blending seamlessly with the surrounding farmed landscape, the park pioneered new approaches to landscape design and influenced the development of landscape architecture in Europe and America. Designed as a 'painting with plants', it did not seek to evoke classical landscapes, paradise, or some lost perfection, instead using local plants to enhance the inherent qualities of the existing landscape. This integrated landscape extends into the town of Muskau with green passages that formed urban parks framing areas for development. The town thus became a design component in a utopian landscape. The site also features a reconstructed castle, bridges and an arboretum.

Justification for Inscription

Criterion (i): Muskauer Park is an exceptional example of a European landscape park that broke new ground in terms of development towards an ideal made-made landscape.

Criterion (iv): Muskauer Park was the forerunner for new approaches to landscape design in cities, and influenced the development of 'landscape architecture' as a discipline.

Brève Description

Ce parc paysager de 559,90 ha, situé de part et d'autre de la Neisse et de la frontière germano-polonaise, a été créé par le prince Hermann von Pückler-Muskau entre 1815 et 1844. S'inscrivant harmonieusement dans le paysage agricole environnant, ce parc inaugura de nouvelles conceptions paysagères et influença le développement de l'architecture paysagère en Europe et en Amérique. Conçu comme un « tableau de verdure », il ne cherchait pas à évoquer un paysage classique, une image de l'Éden ou quelque perfection perdue, mais exploitait la flore locale pour exalter les qualités intrinsèques du paysage existant. Ce paysage intégré se prolonge jusqu'à la ville de Muskau, avec des zones de verdure constituant des parcs urbains qui encadraient les zones urbanisées. La ville devenait ainsi une des composantes d'un paysage utopique. Le site comprend également un château reconstruit, des ponts et un arboretum.

Justification d'inscription

Critère (i): Considéré comme une oeuvre paysagère majeure, le parc de Muskau est l'un des plus beaux exemples de grand parc paysager européen ; à la lumière des normes et des préceptes de son époque, il se distingue comme une oeuvre exceptionnelle « d'amélioration » du paysage, une oeuvre novatrice en termes de développement vers un idéal de paysage façonné par l'homme.

Critère (iv): Le parc de Muskau est le précurseur des nouvelles approches du paysagisme urbain et rural, et a influencé le développement de l'architecture paysagère en tant que discipline. Il a ainsi marqué une étape significative dans l'évolution de la théorie et de la pratique paysagère.

+ nouvelle ref

India / Inde

2004 – Chhatrapati Shivaji Terminus (formerly Victoria Terminus) / Gare Chhatrapati Shivaji (anciennement gare Victoria) (Criteria ii - iv)

Brief Description

The Chhatrapati Shivaji Terminus, formerly known as Victoria Terminus in Mumbai, is an outstanding example of Victorian Gothic Revival architecture in India, blended with themes deriving from Indian traditional architecture. The building, designed by the British architect F.W. Stevens, became the symbol of Bombay as the 'Gothic City' and the major international mercantile port of India. The terminal was built over ten years starting in 1878 according to a High Victorian Gothic design based on late medieval Italian models. Its remarkable stone dome, turrets, pointed arches, and eccentric ground plan are close to traditional Indian palace architecture. It is an outstanding example of the meeting of two cultures as British architects worked with Indian craftsmen to include Indian architectural tradition and idioms forging a new style unique to Bombay.

Justification for Inscription

Criterion (ii): Chhatrapati Shivaji Terminus of Mumbai (formerly Bombay) exhibits an important interchange of influences from Victorian Italianate Gothic Revival architecture, and from Indian traditional buildings. It became a symbol for Mumbai as a major mercantile port city on the Indian Subcontinent within the British Commonwealth.

Criterion (iv): Chhatrapati Shivaji Terminus is an outstanding example of late 19th century railway architecture in the British Commonwealth, characterized by Victorian Gothic Revival and traditional Indian features, as well as its advanced structural and technical solutions.

Brève description

La Gare Chhatrapati Shivaji, autrefois appelée Gare Victoria, à Mumbai, est un remarquable exemple d'architecture néo-gothique victorienne en Inde, mêlé à des éléments issus de l'architecture traditionnelle indienne. Le bâtiment, conçu par l'architecte britannique F.W. Stevens, allait devenir le symbole de Bombay, la « ville gothique » et le plus important port marchand d'Inde. Le terminal, dont la construction, commencée en 1878, dura dix ans, obéit à une conception du gothique victorien s'inspirant des modèles de la fin du Moyen-Age en Italie. Certains éléments remarquables comme le dôme de pierre, les tourelles, les arcs brisés et le plan excentré rappellent l'architecture des palais indiens traditionnels. C'est un exemple exceptionnel de la rencontre de deux cultures, les architectes britanniques ayant fait appel à des artisans indiens pour intégrer la tradition architecturale indienne afin de créer un style nouveau, propre à Bombay.

Justification d'inscription

Critère (ii): La gare Chhatrapati Shivaji de Mumbai (anciennement Bombay) témoigne d'un échange d'influences considérable de l'architecture de style néo-gothique victorien italianisant et de l'architecture traditionnelle indienne. Elle est devenue le symbole de Mumbai en tant que principale ville portuaire de commerce du sous-continent indien dans le Commonwealth britannique.

Critère (iv): La gare Chhatrapati Shivaji est un exemple éminent de l'architecture ferroviaire de la fin du XIXe siècle dans le Commonwealth britannique, se distinguant par l'association de caractéristiques du style néo-gothique victorien et du style traditionnel de l'Inde ainsi que par des solutions structurelles et techniques avancées.

2003 – White City of Tel-Aviv – the Modern Movement / Ville blanche de Tel-Aviv – le mouvement moderne (Criteria ii - iv)

Brief Description

Tel Aviv was founded in 1909 and developed as a metropolitan city under the British Mandate in Palestine. The White City was constructed from the early 1930s until the 1950s, based on the urban plan by Sir Patrick Geddes, reflecting modern organic planning principles. The buildings were designed by architects who were trained in Europe where they practised their profession before immigrating. They created an outstanding architectural ensemble of the Modern Movement in a new cultural context.

Brève description

Tel-Aviv fut fondée en 1909 et s'est développée comme une ville métropolitaine sous le mandat britannique en Palestine. La ville blanche fut construite à partir du début des années 1930 et jusqu'aux années 1950, selon le plan d'urbanisme de sir Patrick Geddes, reflétant les principes de l'urbanisme organique moderne. Les bâtiments furent conçus par des architectes qui avaient immigré après avoir été formés dans divers pays d'Europe et y avoir exercé leur profession. Dans ce lieu et ce nouveau contexte culturel, ils réalisèrent un ensemble exceptionnel d'architecture du mouvement moderne.

Italy / Switzerland – Italie / Suisse

2008 – Rhaetian Railway in the Albula / Bernina Landscapes / Chemin de fer rhétique dans les paysages de l’Albula et de la Bernina (Criteria ii - iv)

Brief Description

Rhaetian Railway in the Albula / Bernina Landscapes, brings together two historic railway lines that cross the Swiss Alps through two passes. Opened in 1904, the Albula line in the north western part of the property is 67 km long. It features an impressive set of structures including 42 tunnels and covered galleries and 144 viaducts and bridges. The 61 km Bernina pass line features 13 tunnels and galleries and 52 viaducts and bridges. The property is exemplary of the use of the railway to overcome the isolation of settlements in the Central Alps early in the 20th century, with a major and lasting socio-economic impact on life in the mountains. It constitutes an outstanding technical, architectural and environmental ensemble and embodies architectural and civil engineering achievements, in harmony with the landscapes through which they pass.

Outstanding Universal Value

The Rhaetian Railway in the Albula/Bernina Landscapes represents an exemplary railway development for the disenclavement of the Central Alps at the beginning of the 20th century. The railway's socio-economic consequences were substantial and lasting for mountain life, the interchange of human and cultural values, and changes in the relationship between man and nature in the West. The Rhaetian Railway offers a wide diversity of technical solutions for the establishment of the railway in often severe mountain conditions. It is a well designed construction that has been realised with a high degree of quality and it has remarkable stylistic and architectural homogeneity. The railway infrastructure moreover blends in particularly harmoniously with the Alpine landscapes through which it passes.

Criterion (ii): The Rhaetian Railway of Albula/Bernina constitutes an outstanding technical, architectural and environmental ensemble. The two lines, today unified in a single transalpine line, embody a very comprehensive and diversified set of innovative solutions that bear witness to substantial interchanges of human and cultural values in the development of mountain railway technologies, in terms of its architectural and civil engineering achievements, and its aesthetic harmony with the landscapes through which they pass.

Criterion (iv): The Rhaetian Railway of Albula/Bernina is a very significant illustration of the development of mountain railways at high altitudes in the first decade of the 20th century. It represents a consummate example of great quality, which was instrumental in the long-term development of human activities in the mountains. It offers diversified landscapes in conjunction with the railway that are significant of this period of the flourishing of a relationship between man and nature. The railway infrastructures of the Albula and Bernina lines form an authentic ensemble of great integrity. Their technical operation and their maintenance ensure long-term conservation of high quality. The Rhaetian railway company that has unified them and carries out their technical management has introduced technical changes and innovations that are compatible with the concept of authenticity of technological properties that are still in use. The legal protection in place is adequate. The management system of the property is satisfactory, though a reinforcement of the presentation to the public of the founding heritage aspects of the property is desirable.

Brève description

Le chemin de fer rhétique dans le paysage de l'Albula et de la Bernina (Suisse/Italie) rassemble deux lignes ferroviaires historiques qui traversent les Alpes suisses par deux cols. Ouverte en 1904, la ligne de l'Albula, dans le nord de la partie nord-ouest du site, fait 67 km de long. Elle comporte un ensemble impressionnant d'ouvrages avec 42 tunnels et galeries couvertes et 144 viaducs et ponts. Les 61 km de la ligne de la Bernina totalisent 13 tunnels et galeries ainsi que 52 viaducs et ponts. Le bien montre une utilisation exemplaire du chemin de fer pour désenclaver les Alpes centrales au début du XXème siècle; ces deux lignes ferroviaires ont eu un impact socio-économique durable sur la vie en montagne. Les deux lignes présentent un ensemble technique, architectural et environnemental exceptionnel. Elles incarnent des réalisations architecturales et de génie civil en harmonie avec les paysages qu'elles traversent.

Valeur universelle exceptionnelle

Le Chemin de fer rhétique dans les paysages de l'Albula et de la Bernina représente un aménagement ferroviaire exemplaire pour le désenclavement des Alpes centrales, au début du XXe siècle. Ses conséquences socio-économiques ont été importantes et durables pour la vie en montagne, les échanges humains et culturels, l'évolution du rapport de l'homme à la nature en Occident. Le Chemin de fer rhétique offre une large diversité de solutions techniques pour l'établissement de la voie ferrée dans des conditions montagneuses souvent sévères. C'est une réalisation bien conçue et dont la réalisation est de grande qualité. Son homogénéité stylistique et

architecturale est remarquable. L'ensemble ferroviaire s'inscrit en outre d'une manière particulièrement harmonieuse dans les paysages alpins traversés.

Critère (ii): Le chemin de fer rhétique de l'Albula et de la Bernina forme un ensemble technique, architectural et environnemental exceptionnel. Ces deux lignes aujourd'hui unifiées dans une voie transalpine unique présentent un ensemble de solutions innovantes très complet et très diversifié qui témoigne d'échanges culturels considérables dans le développement des technologies ferroviaires adaptées à la montagne, dans ses réalisations architecturales et de génie civil, dans son accord esthétique avec les paysages traversés.

Critère (iv): Le chemin de fer rhétique de l'Albula et de la Bernina illustre d'une manière très significative le développement des lignes ferroviaires de montagne dans la première décennie du XXe siècle, à de hautes altitudes. Il en donne un exemple achevé et de grande qualité, à la base d'un développement de longue durée des activités humaines en montagne. Il offre des paysages diversifiés en association avec le chemin de fer et significatifs de cette période d'épanouissement d'une relation entre l'homme et la nature.

Les infrastructures ferroviaires des lignes de l'Albula et de la Bernina forment un ensemble authentique et intègre. Son fonctionnement technique et son entretien en assurent une conservation durable et de qualité. La Compagnie du chemin de fer rhétique qui les a unifiés et qui les gère techniquement a apporté des changements techniques et des innovations compatibles avec le concept d'authenticité des biens technologiques toujours en usage. La protection juridique en place est appropriée. Le système de gestion du bien est satisfaisant tout en souhaitant un renforcement de la présentation au public des fondements patrimoniaux du bien.

Marshall Islands / Îles Marshall

2010 – Bikini Atoll Nuclear Test Site / Site d'essais nucléaires de l'atoll de Bikini (Criteria iv - vi)

Brief description

In the wake of World War II, in a move closely related to the beginnings of the Cold War, the United States of America decided to resume nuclear testing in the Pacific Ocean, on Bikini Atoll in the Marshall archipelago. After the displacement of the local inhabitants, 67 nuclear tests were carried out from 1946 to 1958, including the explosion of the first H-bomb (1952). Bikini Atoll has conserved direct tangible evidence that is highly significant in conveying the power of the nuclear tests, i.e. the sunken ships sent to the bottom of the lagoon by the tests in 1946 and the gigantic Bravo crater. Equivalent to 7,000 times the force of the Hiroshima bomb, the tests had major consequences on the geology and natural environment of Bikini Atoll and on the health of those who were exposed to radiation. Through its history, the atoll symbolises the dawn of the nuclear age, despite its paradoxical image of peace and of earthly paradise. This is the first site from the Marshall Islands to be inscribed on the World Heritage List.

Briève description

Au lendemain de la Seconde guerre mondiale, en étroite relation avec les débuts de la guerre froide, les Etats-Unis décidèrent de reprendre leurs essais nucléaires dans l'océan Pacifique sur l'atoll de Bikini dans l'archipel des Marshall. Une fois les habitants déplacés, 67 essais nucléaires furent réalisés entre 1946 et 1958, dont celui de la première bombe H (1952). La flotte coulée dans le lagon par les essais de 1946 ou le gigantesque cratère Bravo constituent des témoignages directs des essais nucléaires. D'une puissance totale 7000 fois supérieure à celle d'Hiroshima, ils eurent des conséquences importantes sur la géologie de Bikini, son environnement naturel et la santé des populations irradiées. Par son histoire, l'atoll symbolise l'entrée dans l'âge nucléaire malgré une image paradoxale de paix et de paradis terrestre. Il s'agit du premier site des Iles Marshall à être inscrit sur la Liste du patrimoine mondial.

Mexico / Mexique

1997 – Hospicio Cabañas, Guadalajara / Hospice Cabañas, Guadalajara (Criteria i - ii - iii - iv)

Brief Description

The Hospicio Cabañas was built at the beginning of the 19th century to provide care and shelter for the disadvantaged - orphans, old people, the handicapped and chronic invalids. This remarkable complex, which incorporates several unusual features designed specifically to meet the needs of its occupants, was unique for its time. It is also notable for the harmonious relationship between the open and built spaces, the simplicity of its design, and its size. In the early 20th century, the chapel was decorated with a superb series of murals, now considered some of the masterpieces of Mexican art. They are the work of José Clemente Orozco, one of the greatest Mexican muralists of the period.

Brève description

Conçu comme institution de bienfaisance, l'Hospice Cabañas fut construit au début du XIX^e siècle, pour aider les plus démunis : orphelins, vieillards, handicapés et invalides chroniques. Cet ensemble remarquable présente plusieurs caractéristiques originales, liées à ses fonctions d'oeuvre charitable. Son dessin s'écarte des modèles suivis par les hôpitaux et les hospices de l'époque, ce qui le rend unique. L'harmonie atteinte entre les espaces ouverts et les espaces construits, la simplicité de son dessin ainsi que ses dimensions font de lui un ensemble exceptionnel. Au début du XX^e siècle, sa chapelle a été décorée d'un ensemble de superbes peintures, considérées comme l'un des chefs-d'oeuvre de la peinture murale mexicaine, faites par José Clemente Orozco, l'un des grands muralistes mexicains de cette période.

Breve descripción

Este hospicio se creó a principios del siglo XIX para dispensar cuidados y ofrecer asilo a toda suerte de desamparados, ya fuesen huérfanos, ancianos, discapacitados o inválidos. El conjunto arquitectónico es único en su género porque, a diferencia de los centros análogos de su época, presenta una serie de elementos absolutamente originales, especialmente concebidos para satisfacer las necesidades de los asilados. Son especialmente notables la sencillez de su trazado y sus dimensiones, así como la armonía lograda entre los edificios y los espacios al aire libre. A comienzos del siglo XX, la capilla fue ornamentada con un conjunto de frescos soberbios debidos al pincel de José Clemente Orozco, uno de los grandes muralistas mexicanos de la época. Estas pinturas se consideran hoy en día una gran obra maestra del arte mejicano.

CALL NO: MX.CAB.22 : 1-22 (WHC 815).

2004 – Luis Barragán House and Studio / Maison-atelier de Luis Barragán

(Criteria i - ii)

Brief Description

Built in 1948, the House and Studio of architect Luis Barragán in the suburb of Mexico City represents an outstanding example of the architect's creative work in the post-Second World War period. The concrete building, totalling 1161-m², consists of a ground floor and two upper stories, as well as a small private garden. Barragán's work integrated modern and traditional artistic and vernacular currents and elements into a new synthesis, which has been greatly influential, especially in the contemporary design of gardens, plazas, and landscapes.

Justification for Inscription

Criterion (i): The House and Studio of Luis Barragán represents a masterpiece of the new developments in the Modern Movement, integrating traditional, philosophical and artistic currents into a new synthesis.

Criterion (ii): The work of Luis Barragán exhibits the integration of modern and traditional influences, which in turn have had an important impact especially on the design of garden and urban landscape design.

Brève description

Construite en 1948, la maison-atelier de Luis Barragán dans la banlieue de Mexico constitue un exemple exceptionnel du travail créateur de l'architecte dans la période qui suit la Seconde Guerre mondiale. Le bâtiment de béton, d'une superficie totale de 1161 m², comprend un rez-de-chaussée et deux étages ainsi qu'un petit jardin privatif. L'œuvre de Barragán associe des courants et éléments artistiques modernes et traditionnels en une nouvelle synthèse qui a exercé une influence considérable, notamment sur la conception contemporaine des jardins, des places et des paysages.

Justification d'inscription

Critère (i): La maison-atelier de Luis Barragán est un chef-d'oeuvre des nouveaux développements du mouvement moderne, intégrant les courants traditionnels, philosophiques et artistiques en une nouvelle synthèse.

Critère (ii): L'œuvre de Luis Barragán intègre des influences modernes et traditionnelles, synthèse qui a eu à son tour un impact important, notamment sur la conception des jardins et des paysages urbains.

Descripción breve

Construida en 1948 en los arrabales de la Ciudad de México, la casa-taller del arquitecto Luis Barragán constituye un ejemplo excepcional de la obra creadora de este eminente artista durante el período posterior a la Segunda Guerra Mundial. El edificio, cuya superficie totaliza 1.161 metros cuadrados, es de hormigón armado y consta de una planta baja, dos superiores y un pequeño jardín privado. En la obra de Barragán convergen corrientes estéticas y elementos artísticos modernos y autóctonos tradicionales, dando por resultado una síntesis arquitectónica que ha ejercido una notable influencia en el diseño contemporáneo de paisajes, jardines y plazas.

2007 – Central University City Campus of the Universidad Nacional Autónoma de México (UNAM) / Campus Central de la cité universitaire de l’Universidad Nacional Autónoma de México (UNAM) (Criteria i - ii - iv)

Brief Description

The ensemble of buildings, sports facilities and open spaces of the Central University City Campus of the Universidad Nacional Autónoma de México (UNAM), was built from 1949 to 1952 by more than 60 architects, engineers and artists who were involved in the project. As a result, the campus constitutes a unique example of 20th-century modernism integrating urbanism, architecture, engineering, landscape design and fine arts with references to local traditions, especially to Mexico's pre-Hispanic past. The ensemble embodies social and cultural values of universal significance and is one of the most significant icons of modernity in Latin America.

Outstanding Universal Value

The Central University City Campus of UNAM bears testimony to the modernization of post-revolutionary Mexico in the framework of universal ideals and values related to access to education, improvement of quality of life, integral intellectual and physical education and integration between urbanism, architecture and fine arts. It is a collective work, where more than sixty architects, engineers and artists worked together to create the spaces and facilities apt to contribute to the progress of humankind through education.

The urbanism and architecture of the Central University City Campus of UNAM constitute an outstanding example of the application of the principles of 20th Century modernism merged with features stemming from pre-Hispanic Mexican tradition. The ensemble became one of the most significant icons of modern urbanism and architecture in Latin America, recognized at universal level.

Criterion (i): The Central University City Campus of UNAM constitutes a unique example in the 20th century where more than sixty professionals worked together, in the framework of a master plan, to create an urban architectural ensemble that bears testimony to social and cultural values of universal significance.

Criterion (ii): The most important trends of architectural thinking from the 20th century converge in the Central University City Campus of UNAM: modern architecture, historicist regionalism, and plastic integration; the last two of Mexican origin.

Criterion (iv): The Central University City Campus of UNAM is one of the few models around the world where the principles proposed by Modern Architecture and Urbanism were totally applied; the ultimate purpose of which was to offer man a notable improvement in the quality of life.

Since all the fundamental physical components of the original ensemble remain and no major changes have been introduced, the property satisfies the required conditions of integrity and authenticity. The

campus conserves unaltered its essential physical components: urban design, buildings, open spaces, circulation system and parking areas, landscape design and works of art. Functions have not changed over time. The existing physical components therefore express the historic, cultural and social values of the ensemble, and its authenticity of design, materials, substance, workmanship and functions.

At the national level, the Central University City Campus of UNAM was listed as a National Artistic Monument in July 2005, in the framework of the Federal Law on Archaeological, Artistic and Historic Monuments and Zones. At the local level, the UNAM Campus and the Olympic stadium are defined as heritage conservation zones in the framework of the District Programme for Urban Development (1997) of Coyoacán Delegation, one of the administrative units of Mexico City. Since the University is an autonomous organization, it has its own offices in charge of maintenance and conservation of the campus. Among them, the Governing Plan for University City (1993) rules the future growth of the University facilities, uses of land and maintenance of the campus. The Integral Plan for the University City (2005) constitutes the current management plan for the campus. The physical components are in a good state of conservation, and the process of ageing is controlled by means of plans of maintenance and preservation of both free and constructed spaces. The Office for Special Projects of UNAM developed and implements the Integral Plan for the University City (September 2005). With the aim of implementing and monitoring the Plan, the University will create the University City Management Programme (PROMACU).

Brève description

Le campus qui est constitué d'un ensemble de bâtiments, d'équipements sportifs et d'espaces ouverts dans la zone méridionale de Mexico a été construit entre 1949 et 1952. Plus de 60 architectes, ingénieurs et artistes ont travaillé au projet. Le campus est un superbe exemple du modernisme du XXe siècle, il illustre l'intégration de l'urbanisme, de l'architecture, de l'ingénierie, de l'architecture de paysage et des beaux-arts et leur association avec des références aux traditions locales, notamment le passé préhispanique du Mexique. L'ensemble incarne des valeurs sociales et culturelles de portée universelle. Reconnu dans le monde entier, ce campus est l'un des grands symboles de la modernité en Amérique latine.

Valeur universelle exceptionnelle

Le campus central de la cité universitaire de l'UNAM témoigne de la modernisation du Mexique post-révolutionnaire dans le cadre des valeurs et idéaux universels concernant l'accès à l'éducation, l'amélioration de la qualité de vie, l'éducation complète sur les plans intellectuel et physique et l'intégration entre l'urbanisme, l'architecture et les beaux-arts. Il constitue une création collective pour laquelle plus de 60 architectes, ingénieurs et artistes ont travaillé ensemble dans le but de créer les espaces et équipements susceptibles de contribuer au progrès de l'humanité par le biais de l'éducation.

L'urbanisme et l'architecture du campus central constituent un exemple exceptionnel de l'application des principes du modernisme du XXe siècle fusionnés avec des éléments issus de la tradition mexicaine préhispanique. Cet ensemble est devenu l'une des plus importantes icônes de l'urbanisme et de l'architecture modernes en Amérique latine, reconnue universellement.

Critère (i): Le campus Central de la cité universitaire de l'UNAM est un exemple unique au XXe siècle d'une œuvre à laquelle plus de 60 professionnels ont participé dans le cadre d'un plan directeur en se fixant pour but de créer un ensemble architectural urbain qui témoigne de valeurs sociales et culturelles de portée universelle.

Critère (ii): Les tendances les plus importantes de la pensée architecturale du XXe siècle convergent sur le campus central de la cité universitaire de l'UNAM : l'architecture moderne, le régionalisme historiciste et l'intégration plastique, ces deux derniers étant d'origine mexicaine.

Critère (iv): Le campus central de la cité universitaire de l'UNAM est l'un des rares modèles existant dans le monde où les principes proposés par l'architecture et l'urbanisme modernes ont été pleinement appliqués, dans le but ultime d'offrir à l'homme une remarquable amélioration de sa qualité de vie.

Étant donné que les éléments physiques fondamentaux de l'ensemble d'origine sont toujours présents et qu'aucune modification majeure n'a été apportée, le bien répond aux conditions d'intégrité et d'authenticité. Les éléments physiques essentiels du campus sont restés inchangés : tracé urbain, bâtiments, espaces ouverts, système de circulation et aires de stationnement, conception du paysage et œuvres d'art. Les éléments physiques existants expriment donc les valeurs historiques, culturelles et sociales de cet ensemble, de même que son authenticité en termes de conception, de matériaux, de substance, d'exécution et de fonctions.

Au niveau national, le campus central a été classé monument artistique national en juillet 2005, dans le cadre de la loi fédérale sur les monuments et les zones archéologiques, artistiques et historiques. Au niveau local, le campus central et le stade olympique sont définis comme étant des zones de conservation du patrimoine dans le cadre du programme du district pour le développement urbain (1997) élaboré par la délégation de Coyoacán, l'une des unités administratives de la ville de Mexico. L'université, étant une organisation autonome, a ses propres services en charge de l'entretien et de la conservation du campus. Parmi ceux-ci, le plan de direction de la cité universitaire (1993) régit l'accroissement futur des équipements universitaires, l'utilisation du terrain et l'entretien du campus.

Le plan global pour la cité universitaire (2005) est le plan de gestion actuel du campus. Les éléments physiques sont en bon état de conservation et le processus de vieillissement est contrôlé au moyen de plans d'entretien et de préservation pour les espaces bâties ou non bâties. Le Bureau des projets spéciaux de la UNAM a élaboré et met en œuvre le plan global pour la cité universitaire (septembre 2005). Afin d'appliquer le plan et d'en assurer le suivi, l'université va instaurer le programme de gestion de la cité universitaire (PROMACU).

Breve descripción

El campus, que está constituido por un conjunto de edificios, instalaciones deportivas y espacios abiertos en la zona meridional de México, fue construido entre 1949 y 1952. Más de 60 arquitectos, ingenieros y artistas trabajaron en el proyecto. El campus es un gran ejemplo del modernismo del siglo XX, mostrando la integración del urbanismo, la arquitectura, la ingeniería, la arquitectura de paisaje y las bellas artes y su asociación con referencias a las tradiciones locales, especialmente al pasado prehispánico de México. El conjunto encarna valores sociales y culturales de importancia universal y es reconocido mundialmente como uno de los símbolos más significativos de la modernidad en América Latina.

Valor universal excepcional

El campus central de la ciudad universitaria de la UNAM es testimonio de la modernización del México postrevolucionario dentro de un marco de valores e ideales universales concernientes al acceso a la educación, a la mejora de la calidad de vida, a la completa educación en el plano intelectual y físico y la integración entre urbanismo, arquitectura y bellas artes. Constituye una creación colectiva en la cual más de 60 arquitectos, ingenieros y artistas han trabajado juntos con el objetivo de crear un espacio e instalaciones susceptibles de contribuir al progreso de la humanidad por la vía de la educación.

El urbanismo y la arquitectura del campus central constituyen un ejemplo excepcional de la aplicación de los principios del modernismo del siglo XX fusionados con elementos que vienen de la tradición mexicana prehispánica. Este conjunto ha sido reconocido universalmente como uno de los iconos del urbanismo y de la arquitectura moderna en América Latina.

Criterio (i): El campus central de la ciudad universitaria de la UNAM es un ejemplo único del siglo XX de una obra en la que más de 60 profesionales han participado dentro del marco de un plan director fijándose por objetivo crear un conjunto de arquitectura urbana que sea testimonio de valores sociales y culturales de importancia universal.

Criterio (ii): Las tendencias más importantes del pensamiento arquitectónico del siglo XX convergen sobre el campus central de la ciudad universitaria de la UNAM : la arquitectura moderna, el regionalismo historicista y la integración plástica, estos dos últimos de origen mexicano.

Criterio (iv): El campus central de la ciudad universitaria de la UNAM es uno de los pocos modelos existentes en el mundo donde los principios propuestos por la arquitectura y el urbanismo moderno han sido plenamente aplicados, con el objetivo último de ofrecer al hombre una considerable mejora de su calidad de vida.

Como los elementos físicos fundamentales del conjunto de origen están aún presentes y ninguna gran modificación ha sido realizada, el bien responde a las condiciones de integridad y autenticidad. Los elementos físicos esenciales del campus han permanecido intactos : trazado urbano, edificios, espacios abiertos, sistema de circulación y áreas de estacionamiento, concepción del paisaje y obras de arte. Los elementos físicos existentes representan de este modo los valores históricos, culturales y sociales de este conjunto, así como su autenticidad en términos de concepción, de materiales, de sustancia, de ejecución y de funciones.

A nivel nacional el campus central fue clasificado como monumento artístico nacional en julio de 2005, dentro del marco de la ley federal sobre monumentos y zonas arqueológicas, artísticas e históricas. A nivel local, el campus central y el estadio olímpico son definidos como zonas de conservación del patrimonio dentro del marco del programa del distrito para el desarrollo urbano (1997) elaborado por la delegación de Coyoacán, una de las unidades administrativas de la ciudad de México. La universidad, como organización autónoma, tiene sus propios servicios encargados del mantenimiento y conservación del campus. Entre ellos, el plan de dirección de la ciudad universitaria (1993) encargado del futuro crecimiento de las instalaciones universitarias, el uso del terreno y el mantenimiento del campus. El plan global para la ciudad universitaria (2005) es el plan para la gestión actual del campus. Los elementos físicos están en buen estado de conservación y el proceso de envejecimiento es controlado por medio de planes de mantenimiento y preservación para espacios edificados o no edificados. La oficina de proyectos especiales de la UNAM elaboró y puso en marcha el plan global para la ciudad universitaria (septiembre 2005). Con el fin de aplicar el plan y asegurar la continuidad, la universidad va a instaurar el programa de gestión de la ciudad universitaria (PROMACU).

Morocco / Maroc

2012 – Rabat, Modern Capital and Historic City: a Shared Heritage / Rabat, capitale moderne et ville historique : un patrimoine en partage (Criteria ii – iv)

Brief Description

Located on the Atlantic coast in the north-west of Morocco, the site is the product of a fertile exchange between the Arabo-Muslim past and Western modernism. The inscribed city encompasses the new town conceived and built under the French Protectorate from 1912 to the 1930s, including royal and administrative areas, residential and commercial developments and the Jardins d'Essais botanical and pleasure gardens. It also encompasses older parts of the city dating back to the 12th century. The new town is one of the largest and most ambitious modern urban projects built in Africa in the 20th century and probably the most complete. The older parts include Hassan Mosque (begun in 1184) and the Almohad ramparts and gates, the only surviving parts of the project for a great capital city of the Almohad caliphate as well as remains from the Moorish, or Andalusian, principality of the 17th century.

Brève description

Située sur la façade atlantique, au nord-ouest du Maroc, Rabat est le résultat d'un dialogue fructueux entre le passé arabo-musulman et le modernisme occidental. Le site comprend la « ville nouvelle », conçue et construite sous le Protectorat français de 1912 aux années 1930, incluant la résidence royale, des administrations coloniales, des ensembles résidentiels et commerciaux, le jardin d'Essais – botanique et d'agrément.. On y trouve aussi des parties anciennes de la ville qui remontent parfois au XIe siècle. La « ville nouvelle » représente un des plus grands et plus ambitieux projets urbains du XXe siècle en Afrique, probablement le plus complet. Les parties anciennes abritent la mosquée Hassan (début de la construction en 1184) ainsi que les remparts et portes almohades, seuls vestiges subsistant d'un grand projet de ville capitale du califat almohade. On y trouve aussi des vestiges de la principauté morisque, ou andalouse, du XVIIe siècle.

2014 – Van Nellefabriek (criteria ii, iv)

Brief Description

Van Nellefabriek was designed and built in the 1920s on the banks of a canal in the Spaanse Polder industrial zone north-west of Rotterdam. The site is one of the icons of 20th-century industrial architecture, comprising a complex of factories, with façades consisting essentially of steel and glass, making large-scale use of the curtain wall principle. It was conceived as an 'ideal factory', open to the outside world, whose interior working spaces evolved according to need, and in which daylight was used to provide pleasant working conditions. It embodies the new kind of factory that became a symbol of the modernist and functionalist culture of the inter-war period and bears witness to the long commercial and industrial history of the Netherlands in the field of importation and processing of food products from tropical countries, and their industrial processing for marketing in Europe.

Justification for Inscription

Criterion (ii): The Van Nellefabriek brings together and makes use of technical and architectural ideas originating from various parts of Europe and North America in the early 20th century. It is exceptionally successful both in terms of its industrial setup and its degree of architectural and aesthetic accomplishment. It represents an exemplary contribution by the Netherlands to the Modernism of the inter-war years, and has since its construction become an emblematic example and an influential reference throughout the world.

Criterion (iv): In the context of industrial architecture in the first half of the 20th century, the Van Nellefabriek is an outstanding illustration of the values of relationships with the environment, the rational organisation of production flows, and dispatch via the nearby communication network, maximum admission of daylight to the internal spaces via the widespread use of a glass curtain wall with metal frames, and open interior spaces. It expresses the values of clarity, fluidity and the opening up of industry to the outside world.

Brève description

Réalisée au cours des années 1920 le long d'un canal de la zone industrielle du Spaanse polder, à Rotterdam, l'usine Van Nelle est un des fleurons de l'architecture industrielle du XXe siècle. Il s'agit d'un ensemble d'usines aux façades de verre et d'acier utilisant à grande échelle le principe du « mur rideau ». Conçue comme une usine idéale, elle est ouverte sur l'extérieur et l'espace intérieur est évolutif en fonction des besoins. La lumière y est mise au service du confort au travail. Elle se veut une usine nouvelle, véritable symbole de la culture architecturale moderniste et fonctionnaliste de l'entre-deux-guerres. Elle témoigne aussi de la longue tradition portuaire et économique néerlandaise dans les domaines du conditionnement de produits agro-alimentaires importés (café, thé, tabac) et leur commercialisation en Europe.

Critère (ii): L'usine Van Nelle est un lieu de rencontre et d'utilisation d'idées techniques et architecturales nées dans différentes parties de l'Europe et de l'Amérique du Nord au début du XXe siècle. Elle apparaît comme une réussite exceptionnelle tant par son implantation industrielle que par son aboutissement architectural et esthétique. C'est une contribution exemplaire des Pays-Bas au mouvement moderne de l'entre-deux-guerres, qui devient à son tour un exemple connu et une référence influente dans le monde entier.

Critère (iv): Au sein de l'architecture industrielle de la première moitié du XXe siècle, l'usine Van Nelle illustre de manière exceptionnelle les valeurs de relation à l'environnement, d'organisation rationnelle des flux de production et de leur expédition par le réseau de communication de proximité, d'éclairage naturel maximal des espaces intérieurs via l'usage généralisé du mur rideau de verre à armatures métalliques et des espaces intérieurs ouverts. Elle exprime des valeurs de clarté, de fluidité et d'ouverture du monde industriel vers l'extérieur.

2000 – Rietveld Schröderhuis (Rietveld Schröder House) / Rietveld Schröderhuis (Maison Schröder de Rietveld) (Criteria i - ii)

Brief Description

The Rietveld Schröder House in Utrecht was commissioned by Ms Truus Schröder-Schräder, designed by the architect Gerrit Thomas Rietveld, and built in 1924. This small family house, with its interior, the flexible spatial arrangement, and the visual and formal qualities, was a manifesto of the

ideals of the De Stijl group of artists and architects in the Netherlands in the 1920s, and has since been considered one of the icons of the Modern Movement in architecture

Justification for Inscription

Criterion (i): The Rietveld Schröderhuis in Utrecht is an icon of the Modern Movement in architecture and an outstanding expression of human creative genius in its purity of ideas and concepts as developed by the De Stijl movement.

Criterion (ii): With its radical approach to design and the use of space, the Rietveld Schröderhuis occupies a seminal position in the development of architecture in the modern age..

Brève description

Commandée par Mme Truus Schröder-Schräder et conçue par l'architecte Gerrit Thomas Rietveld, cette maison d'Utrecht fut construite en 1924. Cette petite demeure familiale, avec son intérieur, son organisation spatiale flexible et ses qualités visuelles et formelles, était un manifeste des idéaux des artistes et architectes néerlandais appartenant au groupe De Stijl au cours des années vingt. Elle est désormais reconnue comme l'une des icônes du mouvement moderne dans l'architecture.

Justification d'inscription

Critère (i) La maison Schröder de Rietveld, à Utrecht, est une icône du mouvement moderne en architecture et une expression exceptionnelle du génie créateur humain dans la pureté des idées et des concepts qui la sous-tendent, tels que développés par le mouvement De Stijl. Critère (ii) Avec son approche radicale du design et de l'utilisation de l'espace, la Rietveld Schröderhuis occupe une position prédominante dans le développement de l'architecture contemporaine. Critère vi La Rietveld Schröderhuis est un manifeste des idées et des concepts du Stijl, un des mouvements modernes les plus influents de l'art et de l'architecture.

Poland / Pologne

2006 – Centennial Hall in Wrocław / Halle du Centenaire de Wrocław

(Criteria i - ii - iv)

Brief Description

The Centennial Hall, a landmark in the history of reinforced concrete architecture, was erected in 1911-1913 by the architect Max Berg as a multi-purpose recreational building, situated in the Exhibition Grounds. In form it is a symmetrical quatrefoil with a vast circular central space that can seat some 6,000 persons. The 23m-high dome is topped with a lantern in steel and glass. The Centennial Hall is a pioneering work of modern engineering and architecture, which exhibits an important interchange of influences in the early 20th century, becoming a key reference in the later development of reinforced concrete structures.

Justification for Inscription

Criterion (i): The Centennial Hall of Wrocław is a creative and innovative example in the development of construction technology in large reinforced concrete structures. The Centennial Hall occupies a key position in the evolution of methods of reinforcement in architecture, and one of the climax points in the history of the use of metal in structural consolidation.

Criterion (ii): The Centennial Hall is a pioneering work of modern engineering and architecture, which exhibits an important interchange of influences in the early 20th century, becoming a key reference in the later development of reinforced concrete structures.

Criterion (iv): As part of the exhibition grounds of Wrocław, the Centennial Hall is an outstanding example of modern recreational architecture that served a variety of purposes, ranging from conferences and exhibitions to concerts, theatre and opera.

Brève description

La Halle du centenaire, un jalon de l'histoire de l'architecture en béton armé, a été construite entre 1911 et 1913 par l'architecte Max Berg. C'est un bâtiment à plan central au cœur du Parc des Expositions servant de salle d'exposition polyvalente. La Halle du centenaire forme un quadrilobe symétrique, avec un vaste espace circulaire au centre qui peut accueillir 6 000 sièges. Le dôme nervuré de 23 m est coiffé d'une lanterne d'acier et de verre. La Halle du centenaire est un exemple précurseur du début de l'architecture et de l'ingénierie moderne ; elle illustre un important échange d'influences au début du XXe siècle et elle est devenue une référence majeur dans l'évolution postérieure des structures en béton armé.

Justification d'inscription

Critère (i): La halle du Centenaire de Wrocław est un exemple créatif et novateur dans le développement de la technologie de construction de grandes structures en béton armé. Elle occupe

une position clé dans l'évolution des méthodes de renforcement en architecture, et c'est l'un des temps les plus marquants dans l'histoire de l'utilisation du métal comme matériau de consolidation structurelle.

Critère (ii): La halle du Centenaire est une oeuvre pionnière de l'ingénierie et de l'architecture moderne, qui illustre un important échange d'influences au début du XXe siècle et qui est devenue une référence majeure dans le développement ultérieur des structures en béton armé.

Critère (iv): En tant que partie intégrante du parc des expositions de Wrocław, la halle du Centenaire est un exemple exceptionnel d'architecture de loisirs moderne et polyvalente, accueillant à la fois colloques, expositions, concerts, pièces de théâtre et opéras.

1984, 2005 – Works of Antoni Gaudí / Œuvres d'Antoni Gaudí (Criteria i - ii - iv)

Brief Description

Seven properties built by the architect Antoni Gaudí (1852–1926) in or near Barcelona testify to Gaudí's exceptional creative contribution to the development of architecture and building technology in the late 19th and early 20th centuries. These monuments represent an eclectic, as well as a very personal, style which was given free reign in the design of gardens, sculpture and all decorative arts, as well as architecture. The seven buildings are: Casa Vicens; Gaudí's work on the Nativity façade and Crypt of La Sagrada Família; Casa Batlló; Crypt in Colonia Güell.

Justification for Inscription

Criterion (i): The work of Antoni Gaudí represents an exceptional and outstanding creative contribution to the development of architecture and building technology in the late 19th and early 20th centuries.

Criterion (ii): Gaudí's work exhibits an important interchange of values closely associated with the cultural and artistic currents of his time, as represented in el Modernisme of Catalonia. It anticipated and influenced many of the forms and techniques that were relevant to the development of modern construction in the 20th century.

Criterion (iv): Gaudí's work represents a series of outstanding examples of the building typology in the architecture of the early 20th century, residential as well as public, to the development of which he made a significant and creative contribution.

Brève description

Sept biens construits par l'architecte Antoni Gaudí (1852-1926), à Barcelone ou à proximité, inscrits sur la Liste du patrimoine mondial en 1984 témoignent de la contribution créative exceptionnelle de Gaudí au développement de l'architecture et des techniques de construction à la fin du XIXe et au début du XXe siècle. Ces monuments sont l'expression d'un style à la fois éclectique et très personnel qui s'est donné libre cours non seulement dans l'architecture mais aussi dans l'art des jardins, la sculpture et toutes les formes d'arts décoratifs. Les 7 bâtiments sont : le parc Güell, le palais Güell, la Casa Milà, la Casa Vicens, le travail de Gaudí sur la façade de la Nativité et la crypte de la cathédrale de la Sagrada Família, la Casa Batlló, la crypte de la Colònia Güell.

Justification fd'Inscription

Critère (i): L'œuvre d'Antoni Gaudi représente une contribution créative exceptionnelle et remarquable au développement de l'architecture et de la construction de la fin du XIXe siècle et du début du XXe siècle.

Critère (ii): Le travail de Gaudi représente un important échange de valeurs, étroitement associé aux courants culturels et artistiques de son temps représentés par le Modernisme catalan. Il a anticipé et influencé bon nombre de formes et de techniques qui ont joué un rôle dans le développement de la construction moderne au XXe siècle.

Critère (iv): L'œuvre de Gaudi comporte plusieurs exemples remarquables de la typologie de construction de l'architecture du début du XXe siècle, tant résidentielle que publique, pour le développement de laquelle il a joué un rôle majeur sur le plan de la création.

1997 – Palau de la Música Catalana and Hospital de Sant Pau, Barcelona / Palais de la musique catalane et hôpital de Sant Pau, Barcelone (Criteria i - ii - iv)

Brief Description

These are two of the finest contributions to Barcelona's architecture by the Catalan art nouveau architect Lluís Domènech i Montaner. The Palau de la Música Catalana is an exuberant steel-framed structure full of light and space, and decorated by many of the leading designers of the day. The Hospital de Sant Pau is equally bold in its design and decoration, while at the same time perfectly adapted to the needs of the sick.

Justification for Inscription

The Committee decided to inscribe these two properties on the basis of criteria (i), (ii) and (iv), considering that the Palau de la Música Catalana and the Hospital de Sant Pau in Barcelona are masterpieces of the imaginative and exuberant Art Nouveau that flowered in early 20th century Barcelona.

Brève description

Ces deux édifices comptent parmi les plus belles contributions de l'architecte catalan de l'Art nouveau Lluís Domènech i Montaner, à l'architecture de Barcelone. Le Palais de la musique catalane est une construction exubérante à armature d'acier, pleine de lumière et d'espace, décorée par de nombreux grands artistes de l'époque. L'hôpital de Sant Pau manifeste la même hardiesse de conception et de décoration, tout en restant parfaitement adapté aux besoins des malades.

Justification fd'Inscription

Le Comité a décidé l'inscription de ces deux biens sur la base des critères (i), (ii) et (iv), considérant que le Palais de la Musique catalane et l'hôpital de Sant Pau à Barcelone constituent des exemples exceptionnels du style "Art Nouveau", imaginatif et exubérant, qui fleurit dans la Barcelone du 20ème siècle.

1994 – Skogskyrkogården (Criteria ii - iv)

Brief Description

This Stockholm cemetery was created between 1917 and 1920 by two young architects, Asplund and Lewerentz, on the site of former gravel pits overgrown with pine trees. The design blends vegetation and architectural elements, taking advantage of irregularities in the site to create a landscape that is finely adapted to its function. It has had a profound influence in many countries of the world.

Brève description

Ce cimetière de Stockholm fut aménagé de 1917 à 1920 par deux jeunes architectes, Asplund et Lewerentz, dans d'anciennes carrières de gravier plantées de pins. La conception associe la végétation aux éléments architecturaux et tire parti des accidents du terrain. Elle crée un paysage en parfaite harmonie avec sa fonction qui a exercé une profonde influence dans de nombreux pays du monde.

2004 – Varberg Radio Station / Station Radio Varberg (Criteria ii - iv)

Brief Description

The Varberg Radio Station at Grimeton in southern Sweden (built 1922–24) is an exceptionally well-preserved monument to early wireless transatlantic communication. It consists of the transmitter equipment, including the aerial system of six 127-m high steel towers. Although no longer in regular use, the equipment has been maintained in operating condition. The 109.9-ha site comprises buildings housing the original Alexanderson transmitter, including the towers with their antennae, short-wave transmitters with their antennae, and a residential area with staff housing. The architect Carl Åkerblad designed the main buildings in the neoclassical style and the structural engineer Henrik Kreüger was responsible for the antenna towers, the tallest built structures in Sweden at that time. The site is an outstanding example of the development of telecommunications and is the only surviving example of a major transmitting station based on pre-electronic technology.

Justification for Inscription

Criterion (ii): The Varberg radio station at Grimeton is an outstanding monument representing the process of development of communication technology in the period following the First World War.

Criterion (iv): The Varberg radio station is an exceptionally well preserved example of a type of telecommunication centre, representing the technological achievements by the early 1920s, as well as documenting the further development over some three decades.

Brève description

La station radio Varberg, à Grimeton dans le sud-ouest de la Suède (construite en 1922-24), exceptionnellement bien conservée, est un monument des débuts de la communication transatlantique sans fil. Le site comporte le matériel de transmission, y compris le système d'antennes avec ses 6 pylônes de 127 m de haut. Bien qu'ils ne soient plus utilisés régulièrement, les équipements ont été conservés en état de marche. Sur 109,9 ha, on trouve les bâtiments qui abritent l'émetteur Alexanderson originel, dont les pylônes portant les antennes, des transmetteurs d'ondes courtes avec leurs antennes, ainsi qu'une zone résidentielle comportant les logements de fonction du personnel. L'architecte Carl Åkerblad a dessiné le bâtiment principal en style néoclassique, et les pylônes, les plus hauts construits en Suède à l'époque, sont l'œuvre de l'ingénieur Henrik Kreüger. Le site offre une illustration exceptionnelle du développement des communications ; c'est la seule survivante des grandes stations de transmission radio fondées sur les techniques antérieures à l'ère de l'électronique.

Justification d'inscription

Critère (ii): La station radio Varberg de Grimeton est un monument exceptionnel qui témoigne du processus de développement de la technologie des communications dans la période qui suit la Première Guerre mondiale.

Critère (iv): La station radio Varberg est un exemple exceptionnellement bien préservé d'un type de centre de télécommunications qui représente les réalisations technologiques du début des années 1920, et qui apporte des éléments d'information sur l'évolution des télécommunications sur quelque trois décennies.

Switzerland / Suisse

2009 – La Chaux-de-Fonds / Le Locle, watchmaking town planning / La Chaux-de-Fonds / Le Locle, urbanisme horloger (Criteria iv)

Brief Description

The site of La Chaux-de-Fonds / Le Locle watchmaking town-planning consists of two towns situated close to one another in a remote environment in the Swiss Jura mountains, on land ill-suited to farming. Their planning and buildings reflect watchmakers' need of rational organization. Planned in the early 19th century, after extensive fires, the towns owed their existence to this single industry. Their layout along an open-ended scheme of parallel strips on which residential housing and workshops are intermingled reflects the needs of the local watchmaking culture that dates to the 17th century and is still alive today. The site presents outstanding examples of mono-industrial manufacturing-towns which are well preserved and still active. The urban planning of both towns has accommodated the transition from the artisanal production of a cottage industry to the more concentrated factory production of the late 19th and 20th centuries. The town of La Chaux-de-Fonds was described by Karl Marx as a "huge factory-town" in Das Kapital where he analyzed the division of labour in the watchmaking industry of the Jura.

Brève description

Dans les montagnes du Jura suisse, sur des terrains peu propices à l'agriculture, les villes voisines de La Chaux-de-Fonds et Le Locle illustrent un développement urbain original qui reflète les besoins d'organisation rationnelle de la production horlogère. Planifiées au début du XIXème siècle, après trois grands incendies, les villes sont entièrement destinées à cette production. Leurs tracés selon un schéma ouvert et en bandes parallèles, imbriquant l'habitat et les ateliers, correspondent aux besoins de la culture professionnelle horlogère qui remonte au XVIIème siècle mais se maintient encore aujourd'hui. Le site constitue un remarquable exemple de villes ordonnées par une activité mono-industrielle, bien conservées et toujours en activité. La planification urbaine des deux villes s'est adaptée au passage d'une production artisanale avec travail à domicile à une production manufacturière plus intégrée, avec les usines de la fin du XIXème et du XXème siècle. Quand il analyse la division du travail dans Le Capital, Karl Marx prend comme exemple l'industrie horlogère du Jura suisse et invente à propos de La Chaux-de-Fonds le terme de « ville-manufacture ».

Ukraine / Ukraine

2011 – Residence of Bukovinian and Dalmatian Metropolitans / Résidence des métropolites de Bucovine et de Dalmatie (Criteria ii - iii - iv)

Brief description

The Residence of Bukovinian and Dalmatian Metropolitans represents a masterful synergy of architectural styles built by Czech architect Josef Hlavka from 1864 to 1882. The property, an outstanding example of 19th-century historicist architecture, also includes a seminary and monastery and is dominated by the domed, cruciform Seminary Church with a garden and park. The complex expresses architectural and cultural influences from the Byzantine period onward and embodies the powerful presence of the Orthodox Church during Habsburg rule, reflecting the Austro-Hungarian Empire policy of religious tolerance.

Briève description

La résidence des métropolites de Bucovine et de Dalmatie (Ukraine) représente une synergie magistrale de styles architecturaux créée par l'architecte tchèque Josef Hlavka entre 1864 et 1882. Exemple remarquable de l'architecture historiciste du XIX^e siècle, le site comprend également un séminaire et un monastère dominé par une église cruciforme à coupoles du séminaire, avec un jardin et un parc. L'ensemble représente des influences architecturales et culturelles de la période byzantine et incarne le rôle puissant joué par l'Eglise orthodoxe lors du règne des Habsbourg, tout en reflétant la politique de tolérance religieuse de l'empire austro-hongrois.

United Kingdom Of Great Britain And Northern Ireland / Royaume Uni De Grande Bretagne Et D'Irlande Du Nord

2004 – Liverpool – Maritime Mercantile City / Liverpool – Port marchand (Criteria ii - iii - iv)

Brief Description

Six areas in the historic centre and docklands of the maritime mercantile City of Liverpool bear witness to the development of one of the world's major trading centres in the 18th and 19th centuries.

Liverpool played an important role in the growth of the British Empire and became the major port for the mass movement of people, e.g. slaves and emigrants from northern Europe to America. Liverpool was a pioneer in the development of modern dock technology, transport systems and port management. The listed sites feature a great number of significant commercial, civic and public buildings, including St George's Plateau..

Justification for Inscription

Criterion (ii): Liverpool was a major centre generating innovative technologies and methods in dock construction and port management in the 18th and 19th centuries. It thus contributed to the building up of the international mercantile systems throughout the British Commonwealth.

Criterion (iii): the city and the port of Liverpool are an exceptional testimony to the development of maritime mercantile culture in the 18th and 19th centuries, contributing to the building up of the British Empire. It was a centre for the slave trade, until its abolition in 1807, and to emigration from northern Europe to America.

Criterion (iv): Liverpool is an outstanding example of a world mercantile port city, which represents the early development of global trading and cultural connections throughout the British Empire.

Brève description

Six zones dans le centre historique et des bassins du port marchand de Liverpool témoignent du développement de l'un des grands centres du commerce mondial aux XVIIIe et XIXe siècles. La ville joua un rôle important dans l'essor de l'Empire britannique et devint le principal point de passage des mouvements migratoires vers l'Amérique, notamment des esclaves et des émigrants. Liverpool fut la pionnière du développement de la technologie portuaire moderne, des systèmes de transport et de la gestion portuaire. Le site comporte un grand nombre d'édifices commerciaux, civils et publics importants, notamment St. George's Plateau.

Justification d'inscription

Critère (ii): Liverpool a été un pôle majeur, générant des technologies et des méthodes novatrices dans la construction des docks et la gestion portuaire aux XVIIIe et XIXe siècles, et a ainsi contribué à la mise en place des systèmes marchands internationaux dans tout le Commonwealth britannique.

Critère (iii): La ville et le port de Liverpool constituent un témoignage exceptionnel du développement d'une culture marchande maritime aux XVIIIe et XIXe siècles, qui a contribué à l'essor de l'Empire britannique. C'était un centre du commerce d'esclaves, jusqu'à son abolition en 1807, et de l'émigration de l'Europe du Nord vers l'Amérique.

Critère (iv): Liverpool est un exemple exceptionnel de ville portuaire marchande d'envergure mondiale, représentant les premiers développements des liaisons marchandes et culturelles dans tout l'Empire britannique.

Uruguay

2015 – Fray Bentos Industrial Landscape (Criteria i - iv)

Brief Description

Located on land projecting into the Uruguay River west of the town of Fray Bentos, the industrial complex was built following the development of a factory founded in 1859 to process meat produced on the vast prairies nearby. The site illustrates the whole process of meat sourcing, processing, packing and dispatching. It includes buildings and equipment of the Liebig Extract of Meat Company, which exported meat extract and corned-beef to the European market from 1865 and the Anglo Meat Packing Plant, which exported frozen meat from 1924. Through its physical location, industrial and residential buildings as well as social institutions, the site presents an illustration of the entire process of meat production on a global scale.

Justification for inscription

Criterion (ii): Fray Bentos Industrial Landscape is evidence of the interchange of human values between European society and the South American population of the 19th and 20th century which effected social, cultural and economic changes in both places during that period. This was due to the interchange on developments in technology which enabled the production and export of canned and frozen meat on a global scale and to the immigrant workers who arrived from more than 55 nations.

Criterion (iv): The ensemble of cattle pasture and handling facilities, industrial buildings, mechanical facilities, port facilities, residential fabric and green areas linking the river and agricultural areas to the city of Fray Bentos Industrial Landscape stands out as an example of early 20th century industrial development

Brève description

Construit sur une avancée de terre sur le fleuve Uruguay, à l'ouest de la ville de Fray Bentos, le complexe industriel est né du développement d'une usine de salaison de viandes fondée en 1859 dans le but de tirer partie de l'élevage de bétail qu'abritaient les immenses prairies voisines. Illustrant toute la chaîne de la viande – approvisionnement, transformation, emballage et expédition - le site comprend des bâtiments et des équipements de la Liebig Extract of Meat Company, qui exporta du concentré de viande et du corned-beef sur le marché européen à partir de 1865 et de l'Anglo Meat Packing Plant, qui exporta de la viande surgelée à partir de 1924. La combinaison du lieu, de

l'ensemble industriel, des logements et des institutions sociales présents sur le site permet de comprendre tout le processus d'une production de viande d'envergure mondiale.

Justification d'inscription

Critère (ii) : Le paysage industriel de Fray Bentos témoigne de l'échange de valeurs humaines entre la société européenne et la population sud-américaine au XIXe et au XXe siècle, à l'origine de changements sociaux, culturels et économiques sur les deux continents à cette époque. Ceci est dû à l'échange autour des progrès technologiques, qui favorisèrent la production et l'exportation à l'échelle mondiale de viande en conserve et surgelée, et à la population de travailleurs immigrés en provenance de plus de 55 pays différents.

Critère (iv) : L'ensemble des pâturages et des zones réservées au bétail, les bâtiments industriels, les infrastructures mécaniques, les installations portuaires, le tissu résidentiel et les espaces verts reliant le fleuve et les zones agricoles à la ville du paysage industriel de Fray Bentos illustrent un exemple éminent de développement industriel du début du XXe siècle.

Venezuela

2000 – Ciudad Universitaria de Caracas (Criteria i - iv)

Brief Description

The Ciudad Universitaria de Caracas, built to the design of the architect Carlos Raúl Villanueva, between 1940 and 1960, is an outstanding example of the Modern Movement in architecture. The university campus integrates the large number of buildings and functions into a clearly articulated ensemble, including masterpieces of modern architecture and visual arts, such as the Aula Magna with the "Clouds" of Alexander Calder, the Olympic Stadium, and the Covered Plaza.

Justification for Inscription

Criterion (i): The Ciudad Universitaria de Caracas is a masterpiece of modern city planning, architecture and art, created by the Venezuelan architect Carlos Raúl Villanueva and a group of distinguished avant-garde artists.

Criterion (iv): The Ciudad Universitaria de Caracas is an outstanding example of the coherent realization of the urban, architectural, and artistic ideals of the early 20th century. It constitutes an ingenious interpretation of the concepts and spaces of colonial traditions and an example of an open and ventilated solution, appropriate for its tropical environment.

Brève description

La Cité universitaire de Caracas, construite selon les plans de l'architecte Carlos Raúl Villanueva, entre 1940 et 1960, est un exemple exceptionnel du mouvement moderne en architecture. Elle regroupe un grand nombre de bâtiments et de fonctions dans un ensemble clairement articulé et mis en valeur par des chefs-d'œuvre de l'architecture moderne et des arts plastiques, tels que l'Aula Magna avec les Nuages d'Alexander Calder, le stade olympique et la Plaza Cubierta.

Justification d'inscription

Critère (i): La cité universitaire de Caracas est un chef d'œuvre en matière d'art, d'architecture et de conception d'une ville moderne, créée par l'architecte vénézuélien Carlos Raúl Villanueva et par un groupe éminent d'artistes d'avant-garde.

Critère (iv): La cité universitaire de Caracas est un exemple exceptionnel de la réalisation cohérente des idéaux urbains, architecturaux et artistiques du début du XXe siècle. Elle constitue une interprétation ingénieuse des concepts et des espaces d'une tradition coloniale et un exemple d'une solution architecturale ouverte et aérée, adaptée à son environnement tropical.
